

**NYLIAC CorpExec Variable Universal Life Monthly Performance Summary for CorpExec VUL III-V
Average Annual Total Returns as of June 30th, 2008***

This performance information is valid only if preceded or accompanied by an effective product and fund prospectus. Policyowners are asked to consider the investment objectives, risks, and charges and expenses of the investment carefully before investing. Both the product prospectus and underlying fund prospectuses contain this and other information about the product and underlying investment options. Please read the prospectus carefully before investing.

The Investment Divisions offered through the CorpExec Variable Universal Life Series are different from mutual funds that may have similar names but are available directly to the general public. Investment results may differ.

The investment returns and the accumulation value of your policy will fluctuate so that your contract, when surrendered, may be worth more or less than the original cost. Performance reflects the percentage change for the period shown with capital gains and dividends reinvested.

The advisers to some of the Portfolios have assumed or reduced some of those Portfolios' fees and expenses. Had these expenses not been assumed or reduced, the total returns for these Portfolios would have been lower.

The returns should be considered in light of the investment objectives and policies, characteristics and quality of the Portfolio in which the Investment Division invests and the market conditions during the given time period, and should not be considered as a representation of what may be achieved in the future. Rates of return are not representative of actual returns you would receive under the policy. Actual returns may be more or less than those shown and will depend on a number of factors, including the investment allocations by a Policyowner and the different investment rates of return for the Investment Divisions. The portfolio inception dates vary, as shown by the dates above. CorpExec VUL III, IV and V were first offered for sale 12/2001, 9/2004 and 10/2006 respectively. For the period from the inception date, until the product introduction, the performance summary assumes that the CorpExec VUL III, IV and V policies were available, which they were not.

* The values shown are unaudited.

** Categories are classified by Morningstar. Chicago based Morningstar is an independent financial information provider.

*** **An investment in the MainStay VP Cash Management Investment Division is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the MainStay VP Cash Management Investment Division seeks to preserve the value of your investment at \$1.00 per unit, it is possible to lose money.**

Management Net Portfolio Expenses as determined by the fund family.

This product is not available in all states.

The advisers to some of the Portfolios have assumed or reduced some of those Portfolios' fees and expenses. Had these expenses not been assumed or reduced, the total returns for these Portfolios would have been lower.

NYLIAC CorpExec Variable Universal Life Monthly Performance Summary for CorpExec VUL III-V Average Annual Total Returns as of June 30th, 2008*

The chart below shows the monthly Average Annual Total Returns of each Investment Division of the Separate Account based on the actual performance of the Separate Account's underlying Portfolios for the periods when the policy was in existence. For periods before that, the returns are hypothetical. These performance figures reflect all Investment Division level charges; that is, all Portfolio investment management fees and direct operating expenses (shown below), as well as the mortality and expense risk charge deducted from the Separate Account, and the current \$5.00 monthly contract charge. The current annual mortality and expense risk charge is 0.25% of the average daily net asset value of each Investment Division's assets for year 1, 0.45% years 2 through 25, and 0.25% years 26 and beyond. These returns do not reflect policy fees or charges, including the cost of insurance, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown. We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

Performance data quoted represents past performance. Past performance is no guarantee of future results. Due to current market volatility, current performance may be lower or higher than the figures shown. The investment return and the accumulation value of your policy will fluctuate so that your contract, when surrendered, may be worth more or less than the original cost. For current month-end performance information, please visit www.newyorklife.com

Not valid without the quarterly average annual total returns of each Investment Division.

NYLIAC CorpExec Variable Universal Life Monthly Performance Summary for CorpExec VUL III-V Average Annual Total Returns as of June 30th, 2008*

The chart below shows the monthly Average Annual Total Returns of each Investment Division of the Separate Account based on the actual performance of the Separate Account's underlying Portfolios for the periods when the policy was in existence. For periods before that, the returns are hypothetical. These performance figures reflect all Investment Division level charges; that is, all Portfolio investment management fees and direct operating expenses (shown below), as well as the mortality and expense risk charge deducted from the Separate Account, and the current \$5.00 monthly contract charge. The current annual mortality and expense risk charge is 0.25% of the average daily net asset value of each Investment Division's assets for year 1, 0.45% years 2 through 25, and 0.25% years 26 and beyond. These returns do not reflect policy fees or charges, including the cost of insurance, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown. We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

NYLIAC CorpExec Variable Universal Life Monthly Performance Summary for CorpExec VUL III-V Average Annual Total Returns as of June 30th, 2008*

The chart below shows the monthly Average Annual Total Returns of each Portfolio for the periods shown. No policyowner can invest directly in the Portfolios. These performance figures reflect investment management fees and direct operating expenses of the Portfolios. They do not reflect mortality and expense risk charges, cost of insurance charges, monthly contract charges, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown. We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

Performance data quoted represents past performance. Past performance is no guarantee of future results. Due to current market volatility, current performance may be lower or higher than the figures shown. The investment return and the accumulation value of your policy will fluctuate so that your contract, when surrendered, may be worth more or less than the original cost. For current month-end performance information, please visit www.newyorklife.com

Not valid without the quarterly average annual total returns of each Investment Division.

**NYLIAC CorpExec Variable Universal Life Quarterly Performance Summary for CorpExec VUL III-V
Average Annual Total Returns as of June 30th, 2008***

This performance information is valid only if preceded or accompanied by an effective product and fund prospectus. Policyowners are asked to consider the investment objectives, risks, and charges and expenses of the investment carefully before investing. Both the product prospectus and underlying fund prospectuses contain this and other information about the product and underlying investment options. Please read the prospectus carefully before investing.

The Investment Divisions offered through the CorpExec Variable Universal Life Series are different from mutual funds that may have similar names but are available directly to the general public. Investment results may differ.

The investment returns and the accumulation value of your policy will fluctuate so that your contract, when surrendered, may be worth more or less than the original cost. Performance reflects the percentage change for the period shown with capital gains and dividends reinvested.

The advisers to some of the Portfolios have assumed or reduced some of those Portfolios' fees and expenses. Had these expenses not been assumed or reduced, the total returns for these Portfolios would have been lower.

The returns should be considered in light of the investment objectives and policies, characteristics and quality of the Portfolio in which the Investment Division invests and the market conditions during the given time period, and should not be considered as a representation of what may be achieved in the future. Rates of return are not representative of actual returns you would receive under the policy. Actual returns may be more or less than those shown and will depend on a number of factors, including the investment allocations by a Policyowner and the different investment rates of return for the Investment Divisions. The portfolio inception dates vary, as shown by the dates above. CorpExec VUL III, IV and V were first offered for sale 12/2001, 9/2004 and 10/2006 respectively. For the period from the inception date, until the product introduction, the performance summary assumes that the CorpExec VUL III, IV and V policies were available, which they were not.

* The values shown are unaudited.

*** **An investment in the MainStay VP Cash Management Investment Division is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the MainStay VP Cash Management Investment Division seeks to preserve the value of your investment at \$1.00 per unit, it is possible to lose money.**

Management Net Portfolio Expenses as determined by the fund family.

This product is not available in all states.

The advisers to some of the Portfolios have assumed or reduced some of those Portfolios' fees and expenses. Had these expenses not been assumed or reduced, the total returns for these Portfolios would have been lower.

**NYLIAC CorpExec Variable Universal Life Quarterly Performance Summary for CorpExec VUL III-V
Average Annual Total Returns as of June 30th, 2008***

The chart below shows the monthly Average Annual Total Returns of each Investment Division of the Separate Account based on the actual performance of the Separate Account's underlying Portfolios for the periods when the policy was in existence. For periods before that, the returns are hypothetical. These performance figures reflect all Investment Division level charges; that is, all Portfolio investment management fees and direct operating expenses (shown below), as well as the mortality and expense risk charge deducted from the Separate Account, and the current \$5.00 monthly contract charge. The current annual mortality and expense risk charge is 0.25% of the average daily net asset value of each Investment Division's assets for year 1, 0.45% years 2 through 25, and 0.25% years 26 and beyond. These returns do not reflect policy fees or charges, including the cost of insurance, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown. We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

Performance data quoted represents past performance. Past performance is no guarantee of future results. Due to current market volatility, current performance may be lower or higher than the figures shown. The investment return and the accumulation value of your policy will fluctuate so that your contract, when surrendered, may be worth more or less than the original cost. For current month-end performance information, please visit www.newyorklife.com

**NYLIAC CorpExec Variable Universal Life Quarterly Performance Summary for CorpExec VUL III-V
Average Annual Total Returns as of June 30th, 2008***

The chart below shows the monthly Average Annual Total Returns of each Investment Division of the Separate Account based on the actual performance of the Separate Account's underlying Portfolios for the periods when the policy was in existence. For periods before that, the returns are hypothetical. These performance figures reflect all Investment Division level charges; that is, all Portfolio investment management fees and direct operating expenses (shown below), as well as the mortality and expense risk charge deducted from the Separate Account, and the current \$5.00 monthly contract charge. The current annual mortality and expense risk charge is 0.25% of the average daily net asset value of each Investment Division's assets for year 1, 0.45% years 2 through 25, and 0.25% years 26 and beyond. These returns do not reflect policy fees or charges, including the cost of insurance, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown. We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

NYLIAC CorpExec Variable Universal Life Quarterly Performance Summary for CorpExec VUL III-V Average Annual Total Returns as of June 30th, 2008*

The chart below shows the monthly Average Annual Total Returns of each Portfolio for the periods shown. No policyowner can invest directly in the Portfolios. These performance figures reflect investment management fees and direct operating expenses of the Portfolios. They do not reflect mortality and expense risk charges, cost of insurance charges, monthly contract charges, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown. We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.
