

NYLIAC CorpExec Variable Universal Life Monthly Performance Summary & Policy Values for CorpExec VUL II
Values as of January 31, 2010

The chart below shows the monthly Average Annual Returns of each Investment Division of the Separate Account based on the actual performance of the Separate Account's underlying Portfolios for the periods shown. These performance figures reflect all Investment Division level charges, that is, all Portfolio investment management fees and direct operating expenses (shown below), as well as the mortality and expense risk charge deducted from the Separate Account, and the current \$5.00 monthly contract charge. The current annual mortality and expense risk charge is 0.25% of the average daily net asset value of each investment division's assets. These returns do not reflect policy fees or charges, including the cost of insurance, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. **Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown.** We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

Not valid without the quarterly Average Annual returns of each portfolio

NYLIAC CorpExec Monthly Variable Universal Life Performance Summary & Policy Values for CorpExec VUL II
Values as of January 31, 2010

The chart below shows the **monthly Average Annual Returns of each Portfolio for the periods shown. No policyowner can invest directly in the Portfolios.** These performance figures reflect investment management fees and direct operating expenses of the Portfolios. They do not reflect mortality and expense risk charges, cost of insurance charges, monthly contract charges, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. **Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown.** We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

Performance data quoted represents past performance. Past performance is no guarantee of future results. Due to current market volatility, current performance may be lower or higher than the figures shown. The investment return and the accumulation value of your policy will fluctuate so that your contract, when surrendered, may be worth more or less than the original cost. For current month-end performance information, please visit www.newyorklife.com

Not valid without the quarterly Average Annual returns of each portfolio.

NYLIAC CorpExec Variable Universal Life Quarterly Performance Summary & Policy Values for CorpExec VUL II
Values as of December 31, 2009

The chart below shows the monthly Average Annual Returns of each Investment Division of the Separate Account based on the actual performance of the Separate Account's underlying Portfolios for the periods shown. These performance figures reflect all Investment Division level charges; that is, all Portfolio investment management fees and direct operating expenses (shown below), as well as the mortality and expense risk charge deducted from the Separate Account, and the current \$5.00 monthly contract charge. The current annual mortality and expense risk charge is 0.25% of the average daily net asset value of each investment division's assets. These returns do not reflect policy fees or charges, including the cost of insurance, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. **Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown.** We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.

Performance data quoted represents past performance. Past performance is no guarantee of future results. Due to current market volatility, current performance may be lower or higher than the figures shown. The investment return and the accumulation value of your policy will fluctuate so that your contract, when surrendered, may be worth more or less than the original cost. For current month-end performance information, please visit www.newyorklife.com

NYLIAC CorpExec Quarterly Variable Universal Life Performance Summary & Policy Values for CorpExec VUL II
Values as of December 31, 2009

The chart below shows the **monthly Average Annual Returns of each Portfolio for the periods shown**. No policyowner can invest directly in the Portfolios. These performance figures reflect investment management fees and direct operating expenses of the Portfolios. They do not reflect mortality and expense risk charges, cost of insurance charges, monthly contract charges, sales expense charges and state and federal tax charges. If these charges were reflected, the returns would be lower. **Consequently, the returns shown below are greater than actual returns that would have been received under the policy during the periods shown**. We recommend that you obtain a personalized illustration which takes into account the amount of insurance purchased, complete fees and charges under the policy, gender, age and underwriting classification of the insured. Past performance is no guarantee of future results.
