Neuberger Berman Partners Portfolio - Portfolio Manager Change

The following replaces the “Portfolio Manager” section on page 5 of the Prospectus:

Portfolio Manager

The Fund is managed by Eli M. Salzmann (Managing Director of NBM and NB LLC). He has managed the Fund since December 2011.

The following replaces the “Portfolio Manager” section on page 9 of the Prospectus:

Eli M. Salzmann is a Managing Director of Neuberger Berman Management LLC and Neuberger Berman LLC. Mr. Salzmann has been a portfolio manager of the Fund since December 2011. Prior to joining the firm, Mr. Salzmann spent nearly 14 years at another investment manager where he was a Partner, Director of Large-Cap Value and a portfolio manager specializing in U.S. Large-Cap Value strategies.

Please see the Statement of Additional Information for additional information about the Portfolio Manager’s compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager’s ownership of Fund shares.

Neuberger Berman Regency Portfolio - Portfolio Manager Change

The following replaces the “Portfolio Manager” section on page 5 of the Prospectuses:

Portfolio Manager

The Fund is managed by Michael C. Greene (Managing Director of NBM and NB LLC). He has managed the Fund since December 2011.

The following replaces the “Portfolio Manager” section on page 8 of the Class I Prospectus and page 9 of the Class S Prospectus:

Michael C. Greene is a Managing Director of Neuberger Berman Management LLC and Neuberger Berman LLC. Mr. Greene joined the firm in 2008. He has been a portfolio manager of the Fund since December 2011. Prior to joining the firm, Mr. Greene was chief executive officer and chief investment officer from 1985 to 2008 at another investment adviser that was acquired by Neuberger Berman in 2008.

The date of this supplement is December 9, 2011.

THIS PORTFOLIO:

- is offered to certain life insurance companies to serve as an investment vehicle under their variable annuity and variable life insurance contracts and is also offered to certain qualified pension and retirement plans
 - is designed for investors with long-term goals in mind
 - offers you the opportunity to participate in financial markets through a professionally managed stock portfolio
 - carries certain risks, including the risk that you could lose money if Fund shares are worth less than what you paid. This prospectus discusses principal risks of investment in Fund shares. These and other risks are discussed in detail in the Statement of Additional Information (see back cover). If you are buying a variable contract or qualified plan, you should also read the contract's prospectus
 - is a mutual fund, not a bank deposit, and is not guaranteed or insured by the FDIC or any other government agency
-

Fund Summary
Partners Portfolio
Class I

GOAL

The Fund seeks growth of capital.

FEES AND EXPENSES

These tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund. These tables do not reflect any expenses or charges that are, or may be, imposed under a variable annuity or variable life insurance separate account or a qualified pension or retirement plan. For information on these expenses and charges, please refer to the applicable variable contract prospectus, prospectus summary or disclosure statement, or if you purchased shares through a qualified plan, please consult the plan administrator.

Shareholder Fees <i>(fees paid directly from your investment)</i>	N/A
Annual Fund Operating Expenses <i>(expenses that you pay each year as a % of the value of your investment)</i>	
Management fees	0.85
Distribution (12b-1) fees	None
Other expenses	0.26
Total annual operating expenses	1.11

The **expense example** can help you compare costs among mutual funds. The example assumes that you invested \$10,000 for the periods shown, that the Fund earned a hypothetical 5% total return each year, and that the Fund's expenses were those in the table. Actual performance and expenses may be higher or lower.

	1 Year	3 Years	5 Years	10 Years
Expenses	\$113	\$353	\$612	\$1,352

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual operating expenses or in the example, affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 43% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

To pursue its goal, the Fund invests mainly in common stocks of mid- to large-capitalization companies. The Fund seeks to reduce risk by diversifying among many companies and industries.

The Portfolio Manager looks for well-managed companies with strong balance sheets whose stock prices are undervalued. Factors in identifying these firms may include:

- historical low valuation
- strong fundamentals, such as a company's financial, operational, and competitive positions
- relatively high operating profit margins and returns.

The Portfolio Manager may also look for other characteristics in a company, such as a strong market position relative to competitors, a high level of stock ownership among management, and a recent sharp decline in stock price that appears to be the result of a short-term market overreaction to negative news.

At times, the Portfolio Manager may emphasize certain sectors or industries that he believes are undervalued relative to their historical valuations.

The Portfolio Manager follows a disciplined selling strategy and may sell a stock when it reaches a target price, when the company's business fails to perform as expected, or when other opportunities appear more attractive. Although the Fund invests primarily in domestic stocks, it may also invest in stocks of foreign companies.

PRINCIPAL INVESTMENT RISKS

Most of the Fund's performance depends on what happens in the stock market. The market's behavior is unpredictable, particularly in the short term. A company's stock can also be affected by the company's financial condition. There can be no guarantee that the Fund will achieve its goal.

The Fund is a mutual fund, not a bank deposit, and is not guaranteed or insured by the Federal Deposit Insurance Corporation or any other government agency. The value of your investment may fall, sometimes sharply, and you could lose money by investing in the Fund.

The following factors can significantly affect the Fund's performance:

Stock Market Volatility. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. To the extent that the Fund sells stocks before they reach their market peak, it may miss out on opportunities for higher performance.

Market Capitalization Risk. Mid-cap stocks tend to be more volatile than large-cap stocks and are usually more sensitive to economic, political, regulatory and market factors. At any given time, one or both groups of stocks may be out of favor with investors.

Value Investing Risk. With a valuation sensitive approach, there is the risk that stocks may remain undervalued during a given period, because value stocks, as a category, lose favor with investors, or because of a failure to anticipate which stocks or industries would benefit from changing market or economic conditions.

Issuer-Specific Risk. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

Sector Risk. To the extent the Fund invests more heavily in particular sectors, its performance will be especially sensitive to developments that significantly affect those sectors. Individual sectors may move up and down more than the broader market. The several industries that constitute a sector may all react in the same way to economic, political or regulatory events.

Foreign Risk. Foreign securities involve risks in addition to those associated with comparable U.S. securities. Additional risks include exposure to less developed or less efficient trading markets; social, political or economic instability; fluctuations in foreign currencies; nationalization or expropriation of assets; settlement, custodial or other operational risks; and less stringent auditing and legal standards. As a result, foreign securities can fluctuate more widely in price and may also be less liquid than comparable U.S. securities. World markets may all react in similar fashion to important economic or political developments. In addition, foreign markets can perform differently than the U.S. market. Following the market turmoil of 2008-2009, some national economies continue to show instability, which may in turn affect their international trading partners.

Arbitrage Risk. Investing in foreign stocks or thinly-traded securities may involve a greater risk for excessive trading due to potential arbitrage opportunities. For example, to the extent that the Fund's net asset value does not immediately reflect

changes in market conditions or the true market value of these securities, an investor may seek to benefit from the pricing differences caused by this delay.

Currency Risk. Currency fluctuations could erase investment gains or add to investment losses.

Recent Market Conditions. Recent events in the U.S. and global economies have resulted, and may continue to result, in an usually high degree of volatility in the financial markets, both domestic and foreign and in the net asset values of many mutual funds, including to some extent the Fund. Because the situation is unprecedented and widespread, it may be unusually difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of these market events. The severity or duration of these conditions may also be affected by policy changes made by governments or quasi-governmental organizations.

PERFORMANCE

The bar chart and table below provide an indication of the risks of investing in the Fund. The bar chart shows how the Fund’s performance has varied from year to year. The table next to the bar chart shows what the returns would equal if you averaged out actual performance over various lengths of time and compares the returns with the returns of a broad-based market index, which appear immediately below the Fund’s returns. The table also compares the Fund’s performance to the returns of an additional index with characteristics relevant to the Fund’s investment strategy, which appear in the last row of the table. The performance information does not reflect insurance product or qualified plan expenses. If such information were reflected, returns would be less than those shown.

Past performance is not a prediction of future results. Visit www.nb.com or call 800-877-9700 for updated performance information.

AVERAGE ANNUAL TOTAL % RETURNS AS OF 12/31/10

	1 Year	5 Years	10 Years
Partners Portfolio (Class I)	15.55	1.07	3.96
Russell 1000 Value Index (reflects no deduction for fees, expenses or taxes)	15.51	1.28	3.26
S&P 500 Index (reflects no deduction for fees, expenses or taxes)	15.06	2.29	1.41

INVESTMENT MANAGERS

Neuberger Berman Management LLC (NBM) is the Fund’s investment manager. Neuberger Berman LLC (NB) is the Fund’s sub-adviser.

PORTFOLIO MANAGER

The Fund is managed by S. Basu Mullick (Managing Director of NBM and NB). Mr. Mullick has managed the Fund's assets since 1998.

BUYING AND SELLING FUND SHARES

The Fund is designed for use with certain variable insurance contracts and qualified plans. Because shares of the Fund are held by the insurance company or qualified plans involved, you will need to follow the instructions provided by your insurance company or qualified plan for matters involving allocations to this Fund.

When you buy and sell shares of the Fund, the share price is the Fund's net asset value per share. When you buy shares, you will receive the next share price to be calculated after your order has been accepted. The Fund generally is open for business every day the New York Stock Exchange is open.

TAX INFORMATION

Distributions made by the Fund to a variable annuity or variable life insurance separate account or a qualified pension or retirement plan, and exchanges and redemptions of Fund shares made by a separate account or qualified plan ordinarily do not cause the corresponding contract holder or plan participant to recognize income or gain for federal income tax purposes. Please see your variable contract prospectus or the governing documents of your qualified plan for information regarding the federal income tax treatment of the distributions to separate accounts or qualified plans and the holders of the contracts or plan participants.

PAYMENTS TO FINANCIAL INTERMEDIARIES

NBM and/or its affiliates may pay insurance companies or their affiliates, qualified plan administrators, broker-dealers or other financial intermediaries, for services they provide respecting the Fund to current and prospective variable contract owners and qualified plan participants who choose the Fund as an investment option. These payments may create a conflict of interest as they may be made to the intermediaries participating in the Fund to render services to variable contract owners and qualified plan participants, and may also provide incentive for the intermediaries to recommend the Fund's shares or make them available to their current or prospective variable contract owners and qualified plan participants, and therefore promote distribution of the Fund's shares.

Descriptions of Certain Practices and Security Types

Mid- and Large-Cap Stocks. Mid-cap stocks have historically performed more like small-caps than like large-caps. Their prices can rise and fall substantially, although many have the potential to offer attractive long-term returns.

Large-cap companies are usually well established. Compared to mid-cap companies, they may be less responsive to change, but their returns have sometimes led those of mid-cap companies, often with lower volatility.

Foreign Stocks. There are many promising opportunities for investment outside the United States. Foreign markets often respond to different factors and therefore may follow cycles that are different from each other.

For this reason, many investors put a portion of their portfolios in foreign investments as a way of gaining further diversification. While foreign stock markets can be risky, investors gain an opportunity to add potential long-term growth, while diversifying their portfolio.

Value Investing. At any given time, there are companies whose stock prices, whether based on earnings, book value, or other financial measures, do not reflect their full economic opportunities. This happens when investors under-appreciate the business potential of these companies, or are distracted by transient or non-fundamental issues. The value investor examines these companies, searching for those that may rise in price when other investors realize their worth.

Change of Goal. The Fund may change its goal without shareholder approval, although it does not currently intend to do so.

Additional Information about Principal Investment Risks

This section provides additional information about the Fund's principal investment risks described in the Fund Summary section.

Stock Market Volatility. Stock markets are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. Changes in the financial condition of a single issuer can impact the market as a whole. To the extent that the Fund sells stocks before they reach their market peak, it may miss out on opportunities for higher performance. Because many investors buy stocks on margin, increases in interest rates generally can reduce market prices of equities. Terrorism and related geo-political risks have led, and may in the future lead, to increased short-term market volatility and may have adverse long-term effects on world economies and markets generally.

Market Capitalization Risk. To the extent that the Fund emphasizes mid- or large-cap stocks, it takes on the associated risks. Mid-cap stocks tend to be more volatile than large-cap stocks and are usually more sensitive to economic, political, regulatory and market factors. At any given time, one or both groups of stocks may be out of favor with investors.

Value Investing Risk. With a valuation sensitive approach, there is also the risk that stocks may remain undervalued during a given period. This may happen because value stocks, as a category, lose favor with investors compared to growth stocks, or because of a failure to anticipate which stocks or industries would benefit from changing market or economic conditions.

Issuer-Specific Risk. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole. The value of an issuer's stock or debt may deteriorate because of a variety of factors, including disappointing earnings reports by the issuer, unsuccessful products or services, loss of major customers, major litigation against the issuer, or changes in government regulations affecting the issuer or the competitive environment.

Sector Risk. A Fund's investing approach may dictate an emphasis on certain sectors, industries, or sub-sectors of the market at any given time. To the extent the Fund invests more heavily in one sector, industry, or sub-sector of the market, it thereby presents a more concentrated risk and its performance will be especially sensitive to developments that significantly affect those sectors, industries, or sub-sectors. In addition, the value of the Fund's shares may change at different rates compared to the value of shares of a fund with investments in a more diversified mix of sectors and industries. An individual sector, industry, or sub-sector of the market may have above-average performance during particular periods, but may also move up and down more than the broader market. The several industries that constitute a sector may all react in the same way to

economic, political or regulatory events. The Fund's performance could also be affected if the sectors, industries, or sub-sectors do not perform as expected. Alternatively, the lack of exposure to one or more sectors or industries may adversely affect performance.

Foreign Risk. Foreign securities involve risks in addition to those associated with comparable U.S. securities. Additional risks include exposure to less developed or less efficient trading markets; social, political or economic instability; fluctuations in foreign currencies; nationalization or expropriation of assets; settlement, custodial or other operational risks; and less stringent auditing and legal standards. In addition, key information about the issuer, the markets or the local government or economy may be unavailable, incomplete or inaccurate. As a result, foreign securities can fluctuate more widely in price than comparable U.S. securities, and they may also be less liquid. Although foreign securities offer added diversification potential, world markets may all react in similar fashion to important economic or political developments.

In addition, foreign markets can perform differently than the U.S. market. Over a given period of time, foreign securities may underperform U.S. securities - sometimes for years. A Fund could also underperform if the Fund's Portfolio Managers invest in countries or regions whose economic performance falls short. To the extent that a Fund invests a portion of its assets in one country, state, region or currency, an adverse economic, business or political development may affect the value of the Fund's investments more than if its investments were not so concentrated.

Arbitrage Risk. Investing in foreign stocks may also involve a greater risk for excessive trading due to "time-zone arbitrage". If an event occurring after the close of a foreign market, but before the time the Fund computes its current net asset value, causes a change in the price of the foreign stock and such price is not reflected in the Fund's current net asset value, investors may attempt to take advantage of anticipated price movements in securities held by the Fund based on such pricing discrepancies. Similar arbitrage opportunities may occur in a fund which invests in thinly-traded securities, such as the securities of certain mid- or small-capitalization companies. The Board of Trustees has adopted fair valuation policies and procedures intended to reduce the Fund's exposure to such arbitrage opportunities and other potential pricing discrepancies.

Currency Risk. Changes in currency exchange rates bring an added dimension of risk. Currency fluctuations could erase investment gains or add to investment losses.

Recent Market Conditions. Recent events in the U.S. and global economies have resulted, and may continue to result, in an usually high degree of volatility in the financial markets, both domestic and foreign and in the net asset values of many mutual funds, including to some extent the Fund. These events may have also decreased liquidity in some markets and these conditions may occur again. Because the situation is unprecedented and widespread, it may be unusually difficult to identify both risks and opportunities using past models of the interplay of market forces, or to predict the duration of these market events. The severity or duration of these conditions may also be affected by policy changes made by governments or quasi-governmental organizations.

Information about Additional Risks

The Fund may use certain practices and invest in certain securities involving additional risks. Borrowing, securities lending, and using derivatives could create leverage, meaning that certain gains or losses could be amplified, increasing share price movements. If the Fund were to use certain derivatives to gain stock market exposure for excess cash holdings, it would increase its risk of loss.

When the Fund anticipates adverse market, economic, political or other conditions, or it receives large cash inflows, it may temporarily depart from its goal and invest substantially in high-quality short-term investments. This could help the Fund avoid losses, but may mean lost opportunities. In addition, different factors could affect the Fund's performance, and it may not achieve its goal.

Descriptions of Indices

The **Russell 1000 Value Index** is an unmanaged index of U.S. mid- and large-cap value stocks.

The **S&P 500 Index** is an unmanaged index of U.S. large-cap stocks.

Management of the Fund

Investment Managers

Neuberger Berman Management LLC (the "Manager") is the Fund's investment manager, administrator, and distributor. Pursuant to an investment advisory agreement, the Manager is responsible for choosing the Fund's investments and handling its day-to-day business. The Manager carries out its duties subject to the policies established by the Board of Trustees. The investment advisory agreement establishes the fees the Fund pays to the Manager for its services as the Fund's investment manager and the expenses paid directly by the Fund. The Manager engages Neuberger Berman LLC as sub-adviser to provide investment research and related services. Together, the Neuberger Berman affiliates manage approximately \$190 billion in total assets (as of 12/31/2010) and continue an asset management history that began in 1939. For the 12 months ended 12/31/2010, the management/administration fees paid to the Manager were 0.85% of the Funds' average net assets.

A discussion regarding the basis for the approval of the investment advisory and sub-advisory agreements by the Board of Trustees is available in the Fund's annual report to shareholders dated December 31, 2010.

Portfolio Manager

S. Basu Mullick is a Managing Director of Neuberger Berman Management LLC and Neuberger Berman LLC. He has managed the Fund since 1998.

Please see the Statement of Additional Information for additional information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership of Fund shares.

Financial Highlights

Neuberger Berman Advisers Management Trust - Partners Portfolio — I Class Shares

The financial highlights table is intended to help you understand the Fund's financial performance for the past 5 years.

YEAR ENDED DECEMBER 31,	2006	2007	2008	2009	2010	
PER-SHARE DATA (\$)						
Data apply to a single share throughout each year indicated. You can see what the Fund earned (or lost), what it distributed to investors, and how its share price changed.						
	Share price (NAV) at beginning of year	21.41	21.16	20.76	7.11	9.82
Plus:	Income from investment operations					
	Net investment income ⁽⁵⁾	0.12	0.07	0.08	0.03	0.00
	Net gains/losses - realized and unrealized	2.33	1.95	(10.78)	3.98	1.52
	Subtotal: income from investment operations	2.45	2.02	(10.70)	4.01	1.52
Minus:	Distributions to shareholders					
	Income dividends	0.16	0.15	0.09	0.24	0.07
	Capital gain distributions	2.54	2.27	2.86	1.06	-
	Subtotal: distributions to shareholders	2.70	2.42	2.95	1.30	0.07
Equals:	Share price (NAV) at end of year	21.16	20.76	7.11	9.82	11.27
RATIOS (% OF AVERAGE NET ASSETS)						
The ratios show the Fund's expenses and net investment income - as they actually are as well as how they would have been if certain expense waiver and/or offset arrangements had not been in effect.						
	Net expenses - actual	0.91	0.90	0.94	1.05	1.11
	Gross expenses⁽¹⁾	0.91	0.90	0.94	1.06	1.11
	Expenses⁽²⁾	0.91	0.91	0.95	1.05	1.11
	Net investment income - actual	0.57	0.33	0.53	0.34	(0.02)
OTHER DATA						
Total return shows how an investment in the Fund would have performed over each year, assuming all distributions were reinvested. The turnover rate reflects how actively the Fund bought and sold securities.						
	Total return (%)⁽³⁾	12.24 ⁽⁴⁾	9.28 ⁽⁴⁾	(52.37) ⁽⁴⁾	56.23 ⁽⁴⁾	15.55
	Net assets at end of year (in millions of dollars)	631.2	526.7	217.9	96.7	97.2
	Portfolio turnover rate (%)	36	43	38	41	43

Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The above figures have been audited by Ernst & Young LLP, the Fund's independent registered public accounting firm. Their report, along with full financial statements, appears in the Fund's most recent shareholder report (see back cover).

This information does not reflect insurance product or qualified plan expenses. If such expenses were reflected, returns would be less than those shown.

⁽¹⁾ Shows what this ratio would have been if there had been no waiver of investment management fee.

⁽²⁾ Shows what this ratio would have been if there had been no expense offset arrangements.

⁽³⁾ Does not reflect charges and other expenses that apply to the separate account or the related insurance policies. Qualified plans that are direct shareholders of the fund are not affected by insurance related expenses.

⁽⁴⁾ Would have been lower if Neuberger Berman Management LLC had not waived certain expenses.

⁽⁵⁾ Calculated based on the average number of shares outstanding during each fiscal period.

Your Investment

Buying and Selling Fund Shares

The Fund described in this prospectus is designed for use with certain variable insurance contracts and qualified plans. Because shares of the Fund are held by the insurance company or qualified plans involved, you will need to follow the instructions provided by your insurance company or qualified plan for matters involving allocations to this Fund.

Under certain circumstances, the Fund reserves the right to:

- suspend the offering of shares
- reject any exchange or investment order
- satisfy an order to sell Fund shares with securities rather than cash, for certain very large orders
- change, suspend, or revoke the exchange privilege
- suspend or postpone the redemption of shares on days when trading on the New York Stock Exchange is restricted, or as otherwise permitted by the U.S. Securities and Exchange Commission (“SEC”)

Frequent purchases, exchanges and redemptions in fund shares (“market-timing activities”) can interfere with Fund management and affect costs and performance for other shareholders. To discourage market-timing activities by Fund shareholders, the Board of Trustees has adopted market-timing policies and has approved the procedures of the Fund’s principal underwriter for implementing those policies. Pursuant to such policies, the exchange privilege can be withdrawn from any investor that is believed to be “timing the market” or is otherwise making exchanges judged to be excessive. In furtherance of these policies, under certain circumstances, the Fund reserves the right to reject any exchange or purchase order; or change, suspend or revoke the exchange privilege. These policies and procedures are applied consistently to all shareholders.

Neuberger Berman Management LLC applies the Fund’s policies and procedures with respect to market-timing activities by monitoring trading activity in the Fund, identifying excessive trading patterns, and warning or prohibiting shareholders who trade excessively from making further purchases or exchanges of Fund shares. The Fund generally requires insurance companies and qualified plan administrators to enter into agreements with the Fund to enable the Fund to implement and enforce its market-timing policies and procedures. Although the Fund makes efforts to monitor for market-timing activities, the ability of the Fund and Neuberger Berman Management LLC to monitor exchange or purchase orders by individual variable contract owners or qualified plan participants that are submitted to the Fund on an aggregated basis by insurance companies or qualified plans may be limited. Accordingly, there can be no assurance that the Fund or Neuberger Berman Management LLC will be able to mitigate or eliminate all market-timing activities.

Because the Fund is offered to different insurance companies and for different types of variable contracts — annuities, life insurance and qualified plans — groups with different interests will share the Fund. Due to differences of tax treatment and other considerations among these shareholders, it is possible (although not likely) that the interests of the shareholders might sometimes be in conflict. For these reasons, the trustees of the Fund watch for the existence of any material irreconcilable conflicts and will determine what action, if any, should be taken in the event of a conflict. If there is a conflict, it is possible that to resolve it, one or more insurance company separate accounts or qualified plans might be compelled to withdraw its investment in the Fund. While this might resolve the conflict, it also might force the Fund to sell securities at disadvantageous prices.

Share Prices

When you buy and sell shares of the Fund, the share price is the Fund’s net asset value per share.

The Fund is open for business every day the New York Stock Exchange (“Exchange”) is open. The Exchange is closed on all national holidays and Good Friday; Fund shares will not be priced on those days or other days on which the Exchange is closed. The Fund may decide to remain open on a day when the Exchange is closed for unusual reasons. In such a case, the Fund would post a notice on www.nb.com. In general, every buy or sell request you place will go through at the next share price to be calculated after your request has been accepted; check with your insurance company or qualified plan administrator to find out by what time your transaction request must be received in order to be processed the same day. The Fund normally calculates its share price as of the end of regular trading on the Exchange on business days, usually 4:00 p.m. Eastern time. Depending on when your insurance company or qualified plan accepts transaction requests, it is possible that the Fund’s share price could change on days when you are unable to buy or sell shares. Because foreign markets may be open on days when U.S. markets are closed, the value of foreign securities owned by the Fund could change on days when you can’t buy or sell Fund shares. The Fund’s share price, however, will not change until the next time it is calculated.

Share Price Calculations

The price of a share of the Fund is the total value of the Fund’s assets minus its liabilities, divided by the total number of Fund shares outstanding. Because the value of the Fund’s securities changes every business day, the share price usually changes as well.

The Fund values equity securities by using market prices, and values debt securities using bid quotations from independent pricing services or principal market makers. The Fund may value short-term securities with remaining maturities of less than 60 days at cost; these values, when combined with interest earned, approximate market value.

In certain cases, events that occur after markets have closed may render certain prices unreliable or reliable market quotes may not be available. When a market price is not available or the Fund believes a market price does not reflect the amount that the Fund would receive on a current sale of that security, the Fund may substitute for the market price a fair-value estimate made according to methods approved by the Board of Trustees. The Fund may also use these methods to value certain types of illiquid securities.

Fair value pricing generally will be used if the exchange on which a portfolio security is traded closes early or if trading in a particular security was halted during the day and did not resume prior to a Fund’s net asset value calculation. The Fund may also use these methods to value securities that trade in a foreign market, especially if significant events that appear likely to affect the value of these securities occur between the time that the foreign market closes and the time the New York Stock Exchange closes. Significant events may include (1) those impacting a single issuer; (2) governmental actions that affect securities in one sector or country; (3) natural disasters or armed conflicts affecting a country or region; or (4) significant domestic or foreign market fluctuations.

The use of fair value estimates could affect the Fund’s share price. Estimated fair value may involve greater reliance on the manager’s judgment and available data bearing on the value of the security and the state of the markets, which may be incomplete. The estimated fair value of a security may differ from the value that would have been assigned to a security had other sources, such as the last trade price, been used and, because it is an estimate, it may not reflect the price that the Fund would actually obtain if it were to sell the security.

Because foreign markets may be open on days when U.S. markets are closed, the value of foreign securities owned by a Fund could change on days when you can’t buy or sell Fund shares. Remember, though, any purchase or sale takes place at the next share price calculated after your order is accepted.

Fund Structure

While Neuberger Berman Management LLC and Neuberger Berman LLC may serve as the adviser or sub-adviser of other mutual funds that have similar names, goals, and strategies as the Fund, there may be certain differences between the Fund

and these other mutual funds in matters such as size, cash flow patterns and tax matters, among others. As a result, there could also be differences in performance.

Distributions and Taxes

The information below is only a summary of some of the important federal tax considerations generally affecting the Fund and its shareholders; for a more detailed discussion, request a copy of the Statement of Additional Information. Also, you may want to consult your tax professional. Everyone's tax situation is different, and your professional should be able to help you answer any questions you may have.

Distributions. The Fund pays out to shareholders of record any net income and net realized capital gains. Ordinarily, the Fund makes distributions once a year in October. All dividends and other distributions received by shareholders of record are automatically reinvested in Fund shares.

How distributions and transactions are taxed. Dividends and other distributions made by the Fund, as well as transactions in Fund shares, are taxable, if at all, to the extent described in your qualified plan documentation or variable contract prospectus. Please consult such documents for more information.

Other tax-related considerations. The Fund intends to qualify as a regulated investment company for federal income tax purposes by satisfying the requirements under Subchapter M of the Internal Revenue Code of 1986, as amended ("Code"). As a qualified regulated investment company, the Fund is generally not subject to federal income tax on its ordinary income and net realized capital gain that is distributed. It is the Fund's intention to distribute all such income and gains.

Because the Fund is offered through certain variable insurance contracts and qualified plans, it is subject to special diversification standards beyond those that normally apply to regulated investment companies. If the underlying assets of the Fund fail to meet the special standards, you could be subject to adverse tax consequences — for example, some of the income earned by the Fund could generate a current tax liability. Accordingly, the Fund intends to comply with the diversification requirements of Section 817(h) of the Code for variable contracts so that owners of these contracts should not be subject to federal tax on distribution of dividends and income from the Fund to the insurance company's separate accounts. Under the relevant regulations, a Fund is deemed adequately diversified if (i) no more than 55% of the value of the total assets of the Fund is represented by any one investment; (ii) no more than 70% of such value is represented by any two investments; (iii) no more than 80% of such value is represented by any three investments; and (iv) no more than 90% of such value is represented by any four investments. For purposes of these regulations all securities of the same issuer are treated as a single investment, but each United States government agency or instrumentality is treated as a separate issuer. It is possible that complying with these requirements may at times call for decisions that could reduce investment performance.

In unusual circumstances, there may be a risk to you of special tax liabilities from an investment in the Fund.

The foregoing is only a summary of some of the important federal income tax considerations generally affecting the Fund and you. Please refer to the Statement of Additional Information for more information about the tax status of the Fund. You should consult the prospectus for your variable contract or with your tax adviser for information regarding taxes applicable to the variable contract.

Insurance and Qualified Plan Expenses

The fees and policies outlined in this prospectus are set by the Fund and by Neuberger Berman Management LLC. The fee information here does not include the fees and expenses charged by your insurance company under your variable contract or your qualified plan; for those fees, you will need to see the prospectus for your variable contract or your qualified plan documentation.

Distribution and Services

The Fund has a non-fee distribution plan that recognizes that Neuberger Berman Management LLC may use its own resources, including revenues from fees paid to Neuberger Berman Management LLC from the Fund, to pay expenses for services primarily intended to result in distribution of Fund shares.

Neuberger Berman Management LLC may also pay insurance companies or their affiliates and qualified plan administrators (“intermediaries”) for services they provide respecting the Fund to current and prospective variable contract owners and qualified plan participants. These services may include providing information about the Fund, teleservicing support, and delivering Fund documents, among others. These payments may encourage intermediaries participating in the Fund to render services to variable contract owners and qualified plan participants, and may also provide incentive for the intermediaries to make the Fund’s shares available to their current or prospective variable contract owners and qualified plan participants, and therefore promote distribution of the Fund’s shares.

Neuberger Berman Management LLC does not receive any separate fees from the Fund for making these payments.

Portfolio Holdings Policy

A description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio securities is available in the Fund’s Statement of Additional Information. The complete portfolio holdings for the Fund are available at <http://www.nb.com> 15-30 days after each month-end. The Fund’s complete portfolio holdings will remain available at www.nb.com until the subsequent month-end holdings have been posted. Complete portfolio holdings for the Fund will also be available in reports on Form N-Q or Form N-CSR filed with the SEC. Historical portfolio holdings are available upon request.

NEUBERGER BERMAN ADVISERS MANAGEMENT TRUST

Partners Portfolio (Class I) Shares

If you'd like further details on this Fund you can request a free copy of the following documents:
