NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

- A. The accompanying financial statements of NYLIFE Insurance Company of Arizona ("the Company") have been prepared using accounting practices prescribed or permitted by the Arizona Insurance Department.

The Arizona Insurance Department recognizes only statutory accounting practices prescribed or permitted by the state of Arizona for determining and reporting the financial position and results of operations of an insurance company and for determining its solvency under Arizona Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the state of Arizona. Prescribed statutory accounting practices include state laws and regulations. Permitted statutory accounting practices encompass accounting practices that are not prescribed; such practices differ from state to state, may differ from company to company within a state, and may change in the future. Arizona has adopted all prescribed accounting practices found in NAIC SAP. The Company has no permitted practices.

A reconciliation of the Company's net income and capital and surplus at September 30, 2020 and December 31, 2019 between practices prescribed or permitted by the State of Arizona and NAIC SAP is shown below:

- B. No change.

- C. (1) No change.

(2) Bonds not backed by loans are stated at amortized cost using the interest method. Bonds in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. The cost basis of bonds is adjusted for impairments in value deemed to be other than temporary, with the difference between the bond's amortized cost and its fair value recognized as a realized loss reported in net income. The new cost basis of an impaired bond is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment ("OTTI"), the impaired bond is accounted for as if it had been purchased on the measurement date of the impairment. Refer to Note 20 – Fair Value Measurements, for a discussion of the valuation approach and methods for bonds.

- (3) - (5) No change.

(6) Loan-backed and structured securities, which are included in bonds, are valued at amortized cost using the interest method including current assumptions of projected cash flows. Loan-backed and structured securities in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. Amortization of the premium or accretion of discount from the purchase of these securities considers the estimated timing and amount of cash flows of the underlying loans, including prepayment assumptions based on data obtained from external sources or internal estimates. Projected future cash flows are updated monthly, and the amortized cost and effective yield of the securities are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. For high credit quality loan-backed and structured securities (those rated AA or above at the date of acquisition), the adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with the retrospective method. For loan-backed and structured securities that are not of high credit quality (those rated below AA at date of acquisition), certain floating rate securities and securities with the potential for a loss of a portion of the original investment due to contractual prepayments (e.g. interest only securities), the effective yield is adjusted prospectively for any changes in estimated cash flows. Refer to Note 20 – Fair Value Measurements, for a discussion of the valuation approach and methods for bonds.

The cost basis of loan-backed and structured securities is adjusted for impairments in value that are deemed to be other than temporary. An other-than-temporary loss is recognized in net income when it is anticipated that the amortized cost will not be recovered. The entire difference between the loan-backed or structured security's amortized cost and its fair value is recognized in net income only when the Company (1) has the intent to sell the security or (2) it does not have the intent and ability to hold the security to recovery. If neither of these two conditions exists, a realized loss is recognized in net income for the difference between the amortized cost basis of the security and the net present value of projected future cash flows expected to be collected. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the loan-backed or structured security prior to impairment.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary loss, the impaired loan-backed or structured security is accounted for as if it had been purchased on the measurement date of the impairment. Accordingly, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

- (7) - (13) No change.

D. Loan-Backed Securities

- (1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from external sources such as Intex and Blackrock Solutions.
- (2) The Company does not have any loan-backed and structured securities which are other-than-temporarily impaired where the Company intends to sell, or does not have the intent and ability to hold until recovery, at September 30, 2020.
- (3) As of September 30, 2020, the Company did not have any securities where the present value of cash flows expected to be collected is less than the amortized cost basis during the current year.
- (4) The following table presents the Company's gross unrealized losses and fair values of loan-backed and structured securities, aggregated by the length of time that the individual securities have been in a continuous unrealized loss position at September 30, 2020:

	Less than 12 months		12 months or greater		Total	
	Fair Value	Losses	Fair Value	Losses	Fair Value	Losses
Total	\$ 191,342	\$ 9,286	\$ —	\$ —	\$ 191,342	\$ 9,286

- (5) The Company performs quantitative and qualitative analysis to determine if a decline in fair value was temporary. For those securities where the decline was considered temporary, the Company did not take an impairment when it had the ability and intent to hold until recovery. Factors considered in evaluating whether a decline in value is other than temporary include: (1) whether the decline is substantial; (2) the duration that the fair value has been less than amortized cost; (3) the financial condition and near-term prospects of the issuer; and (4) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value. In addition, for the non-agency residential mortgage backed securities ("RMBS") portfolio, the Company updates cash flow projections quarterly. A projection is performed for each security based upon the evaluation of prepayment, delinquency, and default rates for the pool of mortgages collateralizing each security, and the projected impact on the course of future prepayments, defaults, and loss in the pool of mortgages, but do not include market prices. As a result, forecasts may change from period to period and additional impairments may be recognized over time as a result of deterioration in the fundamentals of a particular security or group of securities and/or a continuation of heightened mortgage defaults for a period longer than the assumptions used for the forecasts. Both qualitative and quantitative factors are used in creating the Company's RMBS cash flow models. As such, any estimate of impairments is subject to the inherent limitation on the Company's ability to predict the aggregate course of future events. It should therefore be expected that actual losses may vary from any estimate and the Company may recognize additional other-than-temporary losses.

20. Fair Value Measurements

A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, *Fair Value Measurements*. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.

(1) The levels of the fair value hierarchy are based on the inputs to the valuation as follows:

Level 1 Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

Level 2 Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.

Level 3 Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

The Company had no investments held at fair value at September 30, 2020.

B. Not applicable.

C. The following table presents the carrying amounts and estimated fair value of the Company's financial instruments at September 30, 2020:

	Fair Value	Carrying Value	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Not Practicable
Assets:							
Bonds	\$153,837,300	\$143,177,294	\$ —	\$153,837,300	\$ —	\$ —	\$ —
Cash, cash equivalents and short-term investments	1,309,750	1,309,750	74,789	1,234,961	—	—	—
Investment income due and accrued	970,644	970,644	—	970,644	—	—	—
Total assets	<u>\$156,117,694</u>	<u>\$145,457,688</u>	<u>\$ 74,789</u>	<u>\$156,042,905</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ —</u>

NOTES TO FINANCIAL STATEMENTS

Bonds

The fair value of bonds is determined by considering one of four primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services, (2) securities are priced using a matrix-based pricing methodology, which uses spreads derived from third-party benchmarks bond indices, (3) securities are priced using an internal pricing model or methodology, and (4) securities are submitted to independent brokers for prices.

The pricing service generally uses an income-based approach by using a discounted cash-flow model or it may use a market approach by looking at recent trades of a specific security to determine fair value on public securities or a combination of the two. Typical inputs used by these pricing services include, but are not limited to; benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds.

Independent pricing vendors do not supply prices for private placement bonds. These securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Any private securities that cannot be priced using this methodology, are priced using an internally developed model based upon assigned comparable public issues adjusted for liquidity, maturity and rating or are priced based on internal calculations. The Company assigns a credit rating based upon internal analysis.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics and is classified as Level 2.

Cash, cash equivalents, short-term investments and investment income due and accrued

Cash on hand is classified as Level 1. Cash overdrafts (i.e. outstanding checks) are classified as Level 2. Due to the short-term maturities, the carrying value of short-term investments, cash equivalents and investment income due and accrued is presumed to approximate fair value.

- D. If it is not practicable for an entity to estimate the fair value of that financial instrument or a class of financial instruments, the following shall be disclosed:

(1) - (2) Not applicable.

- E. Not applicable.

21. Other Items

A. Unusual or Infrequent Items

In March 2020, the World Health Organization declared the novel strain of coronavirus, COVID-19, a global pandemic. Management believes the Company has a strong balance sheet, ample liquidity, a robust capital position and is well positioned to continue to meet its policy owner commitments and regulatory, capital and financing requirements. The primary concern is protecting the Company's employees and being there for our policy owners. Nearly all employees and agents are working remotely, while still maintaining our operations and providing services to policy owners. The Company has taken swift product and underwriting actions to further manage our risk and offering payment flexibility and accommodations to our policy owners. While the impact of these actions and events is minimal to the Company's financial results for the quarter ended September 30, 2020, we continue to monitor the economic environment and other potential impacts relating to this pandemic.
