NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

Nature of Operations

New York Life Group Insurance Company of NY ("the Company") is a direct wholly-owned subsidiary of New York Life Insurance Company ("New York Life") (see *New York Life Acquisition* below). The Company's principal products and services include group disability, life and accident insurance primarily marketed in the State of New York. The Company is domiciled in the State of New York and licensed in Alabama, the District of Columbia, Missouri, New York, Pennsylvania and Tennessee.

New York Life Acquisition

On December 31, 2020, Cigna's group life and group disability business which includes the Company and Life Insurance Company of North America ("LINA"), was acquired by New York Life. As of the filing date of this Annual Statement, the Company's name change from "Cigna Life Insurance Company of New York" to "New York Life Group Insurance Company of NY" is pending final approval by the New York State Department of Financial Services. As of the acquisition date, both the Company and LINA became direct wholly owned subsidiaries of New York Life.

COVID-19 and Related Economic Impact

The novel strain of coronavirus ("COVID-19") was declared a pandemic by the World Health Organization in March 2020. From the onset of the COVID-19 pandemic, Cigna and its subsidiaries (including the Company) have taken actions to drive affordability, reduce uncertainty, and make health care easier. For customers, these actions include COVID-19 related expanded access to virtual care, support for access to medication, and advocating for whole person health through various behavioral health initiatives. The COVID-19 pandemic has pervasively impacted the economy and financial markets. The Company closely monitors its financial instruments and maintains effective controls to identify risks and evaluate potential exposures. As of December 31, 2020, the Company has not experienced a material decline in fair value relating to its financial instruments including investments, accounts receivable and reinsurance recoverables. Please refer to Notes 5 and 20 for additional information related to the Company's financial instruments.

A. Accounting Practices

The Statutory Financial Statements of the Company are presented in conformity with accounting practices prescribed or permitted by the State of New York Insurance Department (the "Department"). The Department has adopted the National Association of Insurance Commissioners' ("NAIC") Statutory Accounting Principles ("SAP" or "SSAPs").

The Company's net income (loss) and capital and surplus do not differ between practices prescribed by the Department and NAIC SAP for the years ended December 31, 2020 and 2019.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. NAIC SAP also requires disclosure of contingent assets and liabilities at the date of the financial statements and the related amounts of revenue and expenses during the period. Significant estimates are discussed throughout these Notes; however, actual results could differ from those estimates.

C. Accounting Policy

(1) Financial Instruments: In the normal course of business, the Company enters into transactions involving various types of financial instruments. These financial instruments may include various instruments recorded on the balance sheet and off-balance sheet financial instruments. These instruments may change in value due to interest rate and market fluctuations and most also have credit risk. The Company evaluates and monitors each financial instrument individually and, when management considers it appropriate, uses a derivative instrument or obtains collateral or another form of security to minimize risk of loss.

The Company estimates fair values of financial instruments using prices from third parties or internal pricing methods. Fair value estimates received from third-party pricing services are based on reported trade activity and quoted market prices when available and other market information that a market participant may use to estimate fair value. The internal pricing methods generally involve using discounted cash flow analyses that incorporate current market inputs for similar financial instruments with comparable terms and credit quality as well as other qualitative factors. In instances where there is little or no market activity for the same or similar instruments, the fair value is estimated using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. See Note 20 for information on the Company's fair value measurements.

- (2) Cash and Cash Equivalents: Cash and cash equivalents consist of cash and short-term investments that will mature in three months or less from the time of purchase. Cash equivalents and short-term investments are carried at cost.
- (3) **Investments:** Investments are valued in accordance with the requirements of the NAIC. The carrying values of investments are generally stated as follows:

Bonds and Short-term Investments. Investments in bonds and short-term investments are carried at amortized cost, except those in or near default, that are carried at the lesser of cost or fair value. Amortization of bond premium or discount is calculated using the scientific (constant yield) interest method. Bonds containing call provisions are amortized to call date which produces the lowest asset value (yield to worst). Investments with original maturities of one year or less from the time of purchase are classified as short-term. Bonds are considered impaired and their cost basis is written down to fair value through an asset valuation reserve for credit-related losses or an interest maintenance reserve for interest-related losses, when management expects a decline in value to persist (i.e., the decline is other-than-temporary).

Loan-backed and Other Structured Securities. Loan-backed bonds and structured securities are valued at amortized cost using the constant level yield method. Significant changes in estimated cash flows from the original purchase assumptions are accounted for generally using the retrospective adjustment method. When loan-backed and structured securities have potential for loss of a significant portion of the original investment, significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method. These securities are presented on the balance sheet as bonds.

Prepayment assumptions for loan-backed securities and other structured securities were obtained from external financial data sources. These assumptions are consistent with the current interest rate and economic environment.

When the Company determines it does not expect to recover the amortized cost basis of loan-backed or structured securities with declines in fair value (even if it does not intend to sell and has the intent and ability to hold), the non-interest portion of the impairment loss is recognized in realized investment losses. The non-interest portion is the difference between the amortized cost basis of the loan-backed or structured security and the net present value of its expected future cash flows. Expected future cash flows are based on assumptions about the collateral attributes, including prepayment speeds, default rates and changes in value.

Net Investment Income. When interest and principal payments on investments are current, the Company recognizes interest income when it is earned. The Company stops recognizing interest income for bonds when interest payments are 90 days past due and for commercial mortgage loans when payment is considered delinquent or when certain terms (interest rate or maturity date) of the investment have been restructured. Net investment income on these investments is only recognized when interest payments are received. See Note 7 for further information.

Investment Gains and Losses. Unrealized capital gains and losses on investments carried at fair value are reflected directly in unassigned surplus. Realized capital gains and losses resulting from sales, investment asset write-downs and changes in valuation reserves are based on specifically identified assets and are recognized in net income, subject to the interest maintenance reserve policy described below.

- (4) Non-admitted Assets: In accordance with various SSAP's, certain assets or certain portions of assets are excluded from the Company's admitted assets on its balance sheet through a direct charge to unassigned surplus. Certain assets are limited by factors, such as a percentage of surplus, as to the amounts that qualify as admitted assets. Such assets include electronic data processing equipment and deferred tax assets.
- (5) Aggregate Reserves: Aggregate reserves for life, health and annuity policies are established in amounts that are adequate to meet the estimated future obligations of policies in force and that equal or exceed the required statutory minimums. For individual life policies, liabilities were calculated using the net level premium method and the modified preliminary term method. Annuity liabilities are calculated in such a way that they equal or exceed those produced by application of the Commissioner's Annuity Reserve Valuation Method. Valuation of individual life insurance and annuity policies assumes interest discount using rates that do not exceed the statutory maximums. Discount rates ranged from 2.25% to 10.25% in 2020 and 2.75% to 10.25% in 2019, with some rates grading to lower levels over time. Mortality and morbidity assumptions are predominantly based on industry tables and are at least as conservative as the statutory minimums. The Company discounts the liabilities for certain cancelable disability insurance business. The liabilities for discounted reserves were \$226 million at December 31, 2020, and \$205 million at December 31, 2019. The aggregate amount of discount was \$41 million at December 31, 2020, and \$38 million at December 31, 2019.

- (6) Premium and Deposit Fund Liabilities: Premium and deposit funds are liabilities for investment-related products. These liabilities primarily consist of Retained Asset Account deposits, deposits received from customers and accumulated net investment income on their fund balances less accumulated administrative charges.
- (7) Other Policy and Contract Liabilities: Liabilities for other policy and contract claims are estimates of payments to be made on insurance claims for reported losses and estimates of incurred but not reported losses. Estimated amounts of reinsurance recoverable on unpaid losses are deducted from the liability for unpaid claims.
- (8) **Premiums and Annuity Considerations:** Premiums for individual and group life, disability, and accident insurance are considered revenue when due.
- (9) Income Taxes: The Company is included in the consolidated United States federal income tax return filed by Cigna. Pursuant to the Tax Sharing Agreement with Cigna, federal income taxes are allocated to the Company as if it were filing on a separate return basis. The tax benefit of net operating losses, capital losses and tax credits are funded to the extent they reduce the consolidated federal income tax liability. The Company generally recognizes deferred income taxes when assets and liabilities have different values for financial statement and tax reporting purposes (temporary differences). Limitations of the admitted amount of the deferred tax asset are calculated in accordance with SSAP No. 101, *Income Taxes, a Replacement of SSAP 10R and SSAP 10*. More detailed information about the Company's income taxes is disclosed in Note 9.
- (10) Asset Valuation Reserve (AVR): The AVR is a reserve designed to reduce the impact on unassigned surplus of fluctuations in the fair value of all invested assets by providing an investment reserve for potential future losses on invested assets. The AVR is calculated in accordance with methods prescribed by the NAIC.
- (11) Interest Maintenance Reserve (IMR): The IMR is a reserve designed to defer realized capital gains and losses resulting from general interest rate changes. As prescribed by the NAIC, such realized capital gains and losses, net of related taxes, are deferred and amortized to net investment income over the stated or expected maturity of the invested asset disposed. To the extent the deferral of capital losses results in a net asset, such amount will be non-admitted.
- (12) Reinsurance in Unauthorized Companies: The Company has ceded insurance liabilities with insurers not licensed in New York, or not approved by the Department. To the extent such liabilities are not covered by collateral or other security, New York insurance regulations require the establishment of a liability through a charge to surplus equal to the ceded liabilities placed with such companies. There were no such liabilities as of December 31, 2020 and 2019.
- (13) Other Liabilities: Other liabilities consist of various insurance-related liabilities including amounts related to deposit-type contracts, reinsurance contracts, accrued commissions, general expenses including premium and state taxes, postretirement and post-employment benefits, and escheat liabilities. Legal costs to defend the Company's litigation and arbitration matters are expensed when incurred in cases where the Company cannot reasonably estimate the ultimate cost to defend. In cases where the Company can reasonably estimate the cost to defend, these costs are recognized when the claim is reported.

D. Going Concern

The Company has assessed and concluded that there were no conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date the financial statements were issued.

D. Loan-Backed Securities

- Prepayment assumptions for loan-backed securities and other structured securities were obtained from external financial data sources. These assumptions are consistent with the current interest rate and economic environment.
- (2) The Company had no loan-backed and structured securities with recognized other-than-temporary impairments where the Company had the intent to sell or does not have the intent and ability to retain the investment for a period of time sufficient to recover the amortized cost basis as of December 31, 2020.
- (3) The Company had no loan-backed and structured securities with recognized other-than-temporary impairments where the present value of cash flow expected to be collected is less than the amortized cost basis as of December 31, 2020.
- (4) There were no loan-backed and structured securities with a fair value lower than amortized cost as of December 31, 2020.
- (5) Management reviews loan-backed and structured securities with a decline in fair value from cost for impairment based on criteria that include:
 - length of time and severity of decline;
 - financial and specific near-term prospects of the issuer;
 - changes in the regulatory, economic, or general market environment of the issuer's industry or geographic region; and
 - the Company's intent to sell or the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost.

Based on this review, management believes the unrealized depreciation on loan-backed securities to be temporary and, therefore, has not impaired these amounts.

Net income is defined as income after taxes but prior to realized capital gains or (losses).

NOTE 14 – LIABILITIES, CONTINGENCIES AND ASSESSMENTS

A. Contingent Commitments

Not applicable.

B. Assessments

The Company operates in a regulatory environment that may require its participation in assessments under state insurance guaranty association laws. The Company's exposure to assessments for certain obligations of insolvent insurance companies to policyholders and claimants is based on its share of business written in the relevant jurisdictions. The Company recorded no guaranty fund receivables or liabilities as of December 31, 2020 and 2019.

Penn Treaty. On March 1, 2017, the Commonwealth Court of Pennsylvania entered an order of liquidation of Penn Treaty Network America Insurance Company, together with its subsidiary American Network Insurance Company (collectively "Penn Treaty", a long-term care insurance carrier), triggering guaranty fund coverage and accrual of a liability. Some of the assessments were recorded on a discounted basis, using a weighted average discount rate of 3.5%. As of December 31, 2020 and 2019, there was no recorded liabilities. This assessment is expected to be updated in future periods for changes in the estimate of the insolvency. In addition, a portion of this assessment is expected to be offset in the future by premium tax credits that will be recognized in the period received.

F. All Other Contingencies

Litigation and Other Legal Matters

The Company and/or its subsidiaries are defendants in individual and/or alleged class action suits arising from their agency sales force, insurance (including variable contracts registered under the federal securities law), investment, retail securities, employment and/or other operations, including actions involving retail sales practices. Some of the actions seek substantial or unspecified compensatory and punitive damages. The Company and/or its subsidiaries are also from time to time involved in various governmental, administrative, and investigative proceedings and inquiries. Notwithstanding the uncertain nature of litigation and regulatory inquiries, the outcome of which cannot be predicted, the Company believes that, after provisions made in the financial statements, the ultimate liability that could result from litigation and proceedings would not have a material adverse effect on the Company's financial position; however, it is possible that settlements or adverse determinations in one or more actions or other proceedings in the future could have a material adverse effect on the Company's operating results for a given year. Several commercial banks have customary security interests in certain assets of the Company to secure potential overdrafts and other liabilities of the Company that may arise under custody, securities lending and other banking agreements with such banks. Based upon Company experience, the amount of premiums and other accounts receivable that may become uncollectible and result in a potential loss is not material to the Company's financial condition.

NOTE 20 - FAIR VALUE MEASUREMENTS

A. Fair Value Measurements

Fair value is defined as the price at which an asset could be exchanged in an orderly transaction between market participants at the balance sheet date. The Company's financial assets and liabilities carried at fair value have been classified based upon a hierarchy defined by SAP. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a financial asset or liability carried at fair value would be classified in Level 3 if unobservable inputs were significant to the instrument's fair value, even though the measurement may be derived using inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

- Level 1 Inputs for instruments classified in Level 1 include unadjusted quoted prices for identical assets in active markets accessible at the measurement date. Active markets provide pricing data for trades occurring at least weekly and include exchanges and dealer markets. Assets in Level 1 include actively-traded U.S. government bonds.
- Level 2 Inputs for instruments classified in Level 2 include quoted prices for similar assets in active markets, quoted prices from those willing to trade in markets that are not active, or other inputs that are market observable or can be corroborated by market data for the term of the instrument. Such other inputs include market interest rates and volatilities, spreads and yield curves. An instrument is classified in Level 2 if the Company determines that unobservable inputs are insignificant. Level 2 assets include most private and corporate debt and equity securities, federal agency and municipal bonds, non-government mortgage backed securities, short term investments, and cash equivalents.
- Level 3 Certain inputs for instruments classified in Level 3 are unobservable (supported by little or no market activity) and significant to their resulting fair value measurement. Unobservable inputs reflect the Company's best estimate of what hypothetical market participants

would use to determine a transaction price for the asset at the reporting date. Level 3 assets primarily include certain newly issued, privately-placed, complex or illiquid securities using significant unobservable inputs.

SSAP 100 allows the use of net asset value (NAV) as a practical expedient to fair value for investments in investment companies where there is no readily determinable fair value. There were no such investments owned by the Company for either period presented.

1. Fair Value Measurements at Reporting Date – None

- 2. Fair Value Measurements in Level 3 of the Fair Value Hierarchy None
- 3. Level 3 Transfers None
- 4. Valuation Techniques and Inputs No financial instruments at fair value

B. Other Fair Value Disclosures

The Company provides additional fair value information in Notes 1 and 5.

C. Aggregate Fair Value of All Financial Instruments

The following tables provide the fair value, carrying value, and classification in the fair value hierarchy of the Company's financial instruments as of December 31, 2020 and December 31, 2019.

(In whole dollars)							Not
Financial Assets	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Practicable (Carrying Value)

(In whole dollars)							Not
Financial Assets	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Practicable (Carrying Value)
Bonds Cash, cash equivalents, and short-	361,789,713	341,203,710	960,544	354,555,190	6,273,979	-	
terms	46,254,236	46,254,236	(6,431,963)	52,686,199	-	-	

The fair values presented in the tables above have been estimated using market information when available. The following valuation methodologies and significant assumptions are used by the Company to determine fair value.

Bonds

The Company estimates fair values of bonds using prices from third parties or internal pricing methods. Fair value estimates received from thirdparty pricing services are based on reported trade activity and quoted market prices when available and other market information that a market participant may use to estimate fair value. The internal pricing methods generally involve using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality. In instances where there is little or no market activity for the same or similar instruments, fair value is estimated using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price.

The Company is responsible for determining fair value, as well as the appropriate level within the fair value hierarchy, based on the significance of unobservable inputs. The Company reviews methodologies, processes and controls of third-party pricing services and compares prices on a test basis to those obtained from other external pricing sources or internal estimates. The Company performs ongoing analyses of both prices received from third-party pricing services and those developed internally to determine that they represent appropriate estimates of fair value. The controls executed by the Company include evaluating changes in prices and monitoring for potentially stale valuations. The Company also performs sample testing of sales values to confirm the accuracy of prior fair value estimates. The minimal exceptions identified during these processes indicate that adjustments to prices are infrequent and do not significantly impact valuations. An annual due-diligence review of the most significant pricing service is conducted to review its processes, methodologies, and controls. This review includes a walk-through of inputs for a sample of securities held across various asset types to validate the documented pricing process.

Cash, Cash Equivalents, and Short-Term Investments

Short-term investments, cash equivalents, and cash are carried at cost which approximates fair value. Short-term investments and cash equivalents are classified in Level 2, and cash is classified in Level 1.

The insurance proceeds are retained in the Company's general account and credited to a beneficiary's free interest-bearing account with draft privileges that can be liquidated at any time. The account balance and earned interest are fully guaranteed by the Company. The interest crediting rate is updated weekly and pegged to the Bank Rate Monitor Index, which reflects the average annual effective yield on money markets offered by one hundred large banks and thrifts in the United States. Interest is compounded daily and is credited to accountholders on a monthly basis. The weighted average effective interest rate credited to account holders in 2020 was 0.14%, ranging from 0.09% to 0.21%. Account holders are charged fees only for special services (stop payment requests, checks denied due to insufficient funds, copies of drafts or statements) and are not charged per-draft fees, maintenance charges or withdrawal penalties.

30.4 Describe the sources or methods utilized in determining the fair values:

	Fair values are based on quoted market prices when available. When market prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality. In instances where there is little or no market activity for the same or similar instruments, the Company estimates fair value using methods, models and assumptions that the Company believes a hypothetical market participant would use to determine a current transaction price. These valuation techniques involve some level of estimation and judgement by the Company which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect the risk inherent in a particular methodology, model or input used.
