NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

- A. The accompanying financial statements of Life Insurance Company of North America ("the Company") have been prepared using accounting practices prescribed or permitted by the Pennsylvania Insurance Department ("the Department").

The Department recognizes only statutory accounting practices prescribed or permitted by the State of Pennsylvania for determining and reporting the financial position and results of operations of an insurance company and for determining its solvency under the Pennsylvania State Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures Manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Pennsylvania. Prescribed statutory accounting practices include state laws and regulations. Permitted statutory accounting practices encompass accounting practices that are not prescribed; such practices differ from state to state, may differ from company to company within a state, and may change in the future.

The Company obtained explicit permission from the Department on February 13, 2018 to adopt the NAIC's amended Health Insurance Reserves Model Regulation ("Model Regulation"), which also references Actuarial Guideline XLVII. This amended Model Regulation requires use of the 2012 Group Long Term Disability ("GLTD") Valuation Table as the basis of the minimum claim reserve standard for GLTD for all claims incurred on or after the operative date of the Valuation Table (January 1, 2017), regardless of the issue date of the contract. The Model Regulation also allows, at the Company's discretion, use of the new valuation tables on all open claims. The Department has not adopted the amended Model Regulation to date.

The Company continues to use the permitted practice to apply the 2012 GLTD Valuation Table to all open claims. The Company's 2021 risk based capital was not materially impacted by the permitted accounting practice.

A reconciliation of the Company's net income and capital and surplus at March 31, 2022 and December 31, 2021 between practices prescribed or permitted by the State of Pennsylvania and NAIC SAP is shown below:

- B. No change.
- C. Bonds not backed by loans are stated at amortized cost using the interest method. Bonds in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. The cost basis of bonds is adjusted for impairments in value deemed to be other-than-temporary, with the difference between the bond's amortized cost and its fair value recognized as a realized loss reported in net income. The new cost basis of an impaired bond is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment ("OTTI"), the impaired bond is accounted for as if it had been purchased on the measurement date of the impairment. SVO-Identified bond Exchange Traded Funds ("ETFs") are stated at fair value and reported as bonds. Refer to Note 20 - Fair Value Measurements, for discussion on the valuation approach and methods for bonds.

Loan-backed and structured securities, which are included in bonds, are valued at amortized cost using the interest method including current assumptions of projected cash flows. Loan-backed and structured securities in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. Amortization of the premium or accretion of discount from the purchase of these securities considers the estimated timing and amount of cash flows of the underlying loans, including prepayment assumptions based on data obtained from external sources or internal estimates. Projected future cash flows are updated monthly, and the amortized cost and effective yield of the securities are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. For high credit quality loan-backed and structured securities (those rated AA or above at the date of acquisition), the adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with the retrospective method. For loan-backed and structured securities that are not of high credit quality (those rated below AA at date of acquisition), certain floating rate securities and securities with the potential for a loss of a portion of the original investment due to contractual prepayments (e.g. interest only securities), the effective yield is adjusted prospectively for any changes in estimated cash flows. Refer to Note 20 - Fair Value Measurements, for discussion on the valuation approach and methods for bonds.

The cost basis of loan-backed and structured securities is adjusted for impairments in value that are deemed to be other-than-temporary. An other-than-temporary loss is recognized in net income when it is anticipated that the amortized cost will not be recovered. The entire difference between the loan-backed or structured security's amortized cost and its fair value is recognized in net income only when the Company (1) has the intent to sell the security or (2) it does not have the intent and ability to hold the security to recovery. If neither of these two conditions exists, a realized loss is recognized in net income for the difference between the amortized cost basis of the security and the net present value of projected future cash flows expected to be collected. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the loan-backed or structured security prior to impairment.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary loss, the impaired loan-backed and structured security is accounted for as if it had been purchased on the measurement date of the impairment. Accordingly, the discount (or reduced premium) based on the new cost basis may be accreted into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

D. Going Concern

The Company does not have any doubt about its ability to continue as a going concern.

NOTES TO FINANCIAL STATEMENTS

2. Accounting Changes and Corrections of Errors

Accounting changes adopted to conform to the provisions of NAIC SAP or other state prescribed accounting practices are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is generally reported as an adjustment to unassigned surplus in the period of the change in accounting principle. Generally, the cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

Following the acquisition of the Company by New York Life Insurance Company ("New York Life") on December 31, 2020, New York Life began a detailed review of assets and liabilities of the Company. At the time the 2020 annual statement was filed on February 28, 2021, New York Life had not yet completed its review of the Company's assets and liabilities in accordance with terms of the purchase and sale agreement between New York Life and Cigna. New York Life completed its review by March 31, 2021 and the adjustments identified through the review were reflected in the 2020 audited statutory statements and as a result, were recorded in the first quarter 2021 unaudited financial statements as an out of period adjustment. These adjustments were primarily related to the liabilities for policy reserves and policy claims which decreased surplus by \$129,928,060.

There were no significant accounting changes in 2022 that required adjustments to beginning of period unassigned surplus.

D. Loan-Backed Securities

- (1) Prepayment assumptions for mortgage-backed/loan-backed and structured securities were obtained from external sources such as Intex and Blackrock Solutions.
- (2) The Company does not have any loan-backed and structured securities which are other-than-temporarily impaired where the Company intends to sell, or does not have the intent and ability to hold until recovery at March 31, 2022.
- (3) The Company does not have any loan-backed and structured securities which are other-than-temporarily impaired where the present value of cash flows expected to be collected is less than the amortized cost basis during the current year.
- (4) The following table presents the Company's gross unrealized losses and fair values for loan-backed and structured securities, aggregated by the length of time that the individual securities have been in a continuous unrealized loss position at March 31, 2022:

	Less than 12 Months		12 Months or Greater		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
General Account	\$ 542,908,634	\$ 28,334,512	\$ 82,229,079	\$ 9,621,799	\$ 625,137,713	\$ 37,956,311
Total	\$ 542,908,634	\$ 28,334,512	\$ 82,229,079	\$ 9,621,799	\$ 625,137,713	\$ 37,956,311

- (5) The Company performs quantitative and qualitative analysis to determine if a decline in fair value was temporary. For those securities where the decline was considered temporary, the Company did not take an impairment when it had the ability and intent to hold until recovery. Factors considered in evaluating whether a decline in value is other-than-temporary include: (1) whether the decline is substantial; (2) the duration that the fair value has been less than amortized cost; (3) the financial condition and near-term prospects of the issuer; and (4) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value. In addition, for the non-agency residential mortgage backed securities ("RMBS") portfolio, the Company updates cash flow projections quarterly. A projection is performed for each security based upon the evaluation of prepayment, delinquency, and default rates for the pool of mortgages collateralizing each security, and the projected impact on the course of future prepayments, defaults, and loss in the pool of mortgages, but do not include market prices. As a result, forecasts may change from period to period and additional impairments may be recognized over time as a result of deterioration in the fundamentals of a particular security or group of securities and/or a continuation of heightened mortgage defaults for a period longer than the assumptions used for the forecasts. Both qualitative and quantitative factors are used in creating the Company's RMBS cash flow models. As such, any estimate of impairments is subject to the inherent limitation on the Company's ability to predict the aggregate course of future events. It should therefore be expected that actual losses may vary from any estimate and the Company may recognize additional other-than-temporary losses.

A. The Company entered into a credit agreement with New York Life, effective as of December 31, 2020, which allows the Company to borrow a maximum aggregate amount of \$100,000,000. At March 31, 2022, the credit facility was not used, no interest was paid, and

NOTES TO FINANCIAL STATEMENTS

there was no outstanding balance due. Additionally, the Company had no capital notes outstanding and no external borrowed money outstanding for the three months ended March 31, 2022.

B. Federal Home Loan Bank (“FHLB”) Agreements

(1) On September 30, 2021, the Company became a member of the FHLB of Pittsburgh or the “Bank”. Membership in the Bank provides the Company with a significant source of alternative liquidity. Advances received by the general account are included in the liability for borrowed money on Page 3 - Liabilities, Surplus and Other Funds. When borrowing from the Bank, the Company is required to post collateral in the form of eligible securities, including mortgage-backed, government and agency debt instruments for each of the advances received. Upon any event of default by the Company, the FHLB of Pittsburgh’s recovery from the collateral is limited to the amount of the Company’s liability to the FHLB of Pittsburgh. The table below indicates the amount of FHLB of Pittsburgh stock purchased, collateral pledged, assets and liabilities related to the agreement with the Bank.

(2) FHLB of Pittsburgh Capital Stock

a. Amount of FHLB of Pittsburgh capital stock held, in aggregate, is as follows:

20. Fair Value Measurements

A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, "*Fair Value Measurements*". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.

- (1) The levels of the fair value hierarchy are based on the inputs to the valuation as follows:

Level 1	Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
Level 2	Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.
Level 3	Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

The following table represents the balances of assets and liabilities measured at fair value or net asset value ("NAV") as of March 31, 2022:

Transfers between levels

Transfers between levels may occur due to changes in valuation sources, changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads, or as a result of a security measured at amortized cost at the beginning of the period, but measured at estimated fair value at the end of the period, or vice versa, due to a ratings downgrade or upgrade.

Transfers into and out of Level 3

Transfers into Level 3 totaled \$870,000 for the three months ended March 31, 2022, which relates to \$870,000 of non-agency asset-backed securities that were measured at amortized cost at the beginning of the period and measured at fair value at the end of the period. There were no Transfers out of level 3 for this period.

Level 1 measurements

Separate accounts assets

These assets are comprised of shares of open-ended publically traded mutual funds and are valued at their closing bid prices each business day. The fair values of these investments has been reflected within Level 1 in the fair value hierarchy.

Level 3 measurements

Common stocks

The security is primarily related to equity investments with a privately held government entity FHLB of Pittsburgh, where the price is derived from internal valuations.

- C. The following table presents the carrying amounts and estimated fair values of the Company's financial instruments at March 31, 2022. Bonds

The fair value of bonds is determined by considering one of four primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services, (2) securities are priced using a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices, (3) securities are priced using an internal pricing model or methodology, and (4) securities are submitted to independent brokers for prices.

The pricing service generally uses an income-based approach by using a discounted cash-flow model or it may also use a market approach by looking at recent trades of a specific security to determine fair value on public securities or a combination of the two. Typical inputs used by these pricing services include, but are not limited to; benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds.

Independent pricing vendors do not supply prices for private placement bonds. These securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Any private securities that cannot be priced using this methodology, are priced using an internally developed model based upon assigned comparable public issues adjusted for liquidity, maturity and rating or are priced based on internal calculations. The Company assigns a credit rating based upon internal analysis.

NOTES TO FINANCIAL STATEMENTS

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Common stocks

The fair value of unaffiliated equity securities is determined by considering one of three primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from third-party pricing services, (2) the remaining un-priced securities are submitted to independent brokers for prices, and (3) securities are priced using an internal pricing model or methodology.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including, initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Mortgage loans

The estimated fair value of mortgage loans is determined using an income approach, based upon the present value of the expected cash flows discounted at an interpolated treasury yield plus a spread. The spread is based on management's judgment and assumptions and it takes into account property type, LTV and remaining term of each loan. The spread is a significant component of the pricing inputs. These investments are classified as Level 3.

Cash, cash equivalents, short-term investments and investment income due and accrued

Cash on hand and money market mutual funds are classified as Level 1. Cash overdrafts (i.e. outstanding checks) are classified as Level 2. Due to the short-term maturities of cash equivalents, short-term investments, and investment income due and accrued, carrying value approximates fair value and are classified as Level 2.

Separate accounts assets

Assets within the separate accounts are invested in mutual funds. The fair value of these open-ended publically traded mutual funds are valued at their closing bid prices each business day.

21. Other Items

A. Unusual or Infrequent Items

The disruption caused by the COVID-19 pandemic continues to have a major impact on the global economy, the supply chain and the economies of particular countries and industries. It has also resulted in elevated mortality and morbidity experience for the global population, and could have long-term effects on the Company's life, health and disability insurance businesses. The ultimate extent of the impact of the COVID-19 pandemic will depend on numerous factors, all of which are highly uncertain and cannot be predicted. These factors include the length and severity of the outbreak, including the impact of new variants of the virus and the efficacy of vaccines and therapeutic treatments in combating the virus, the responses to the pandemic taken by governments and private sector businesses, and the impacts on the Company's customers, employees and vendors. Although the Company has taken certain steps to mitigate some of the adverse impacts resulting from the pandemic, these events could have an adverse effect the Company's results of operations and cash flows in any period and, depending on their severity and duration, could also adversely affect the Company's financial condition.
