NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. The accompanying financial statements have been prepared using accounting practices prescribed or permitted by the Delaware State Insurance Department ("the Department" or "statutory accounting practices").

The Department recognizes only statutory accounting practices prescribed or permitted by the State of Delaware for determining and reporting the financial position and results of operations of an insurance company and for determining its solvency under the Delaware State Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Delaware. Prescribed statutory accounting practices include state laws and regulations. Permitted statutory accounting practices encompass accounting practices that are not prescribed; such practices differ from state to state, may differ from company to company within a state, and may change in the future. The Company has no permitted practices.

A reconciliation of the Company's net income and capital and surplus at December 31, 2025 and 2024 between practices prescribed or permitted by the State of Delaware and NAIC SAP is shown below:

B. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements. Management is also required to disclose contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results may differ from those estimates.

C. Life premiums are recognized as revenue when due. Annuity considerations are recognized as revenue when received. Commissions and other costs associated with acquiring new business are charged to operations as incurred. Amounts received or paid under deposit type contracts without mortality or morbidity risk are not reported as income or benefits but are recorded directly as an adjustment to the liability for deposit funds.

Internal replacements refer to transactions whereby a policyholder transfers the surrender value from their current policy into a similar policy. Premiums and benefits from internal replacements are reported gross in the accompanying Statement of Operations. Prior to 2024, the Company's policy was to report on a net basis.

Policy reserves are based on mortality tables and valuation interest rates, which are consistent with statutory requirements and are designed to be sufficient to provide for contractual benefits. The Company holds reserves greater than those developed under the minimum statutory reserving rules when the valuation actuary determines that the minimum statutory reserves are inadequate.

The Company has established policy reserves on contracts issued January 1, 2001 and later that exceed the minimum amounts determined under Appendix A-820, "Minimum Life and Annuity Reserve Standards" of NAIC SAP by approximately $65,816,991.

In addition, the Company uses the following accounting policies:

(1) Cash and cash equivalents includes cash on hand, amounts due from banks and highly liquid debt instruments that have original maturities of three months or less at date of purchase and are carried at amortized cost. Cash and cash equivalents also include money market mutual funds which are stated at fair value. Short-term investments consist of securities with remaining maturities of one year or less, but greater than three months at the time of acquisition and are carried at amortized cost, which approximates fair value.

(2) Bonds that meet the principles-based bond definition ("PBBD") are stated at amortized cost using the interest method. Bonds in or near default (rated NAIC 6) are stated at the lower of amortized cost or fair value. The Company reviews all debt securities to determine if they meet the PBBD criteria to be reported as Schedule D bonds. The review includes confirming that the debt instrument represents a creditor relationship with a fixed payment schedule for one or more future payments and where any non-debt variables are nominal. For all ABS, the Company confirms that credit enhancement to our tranches is substantive from either subordination or overcollateralization. For ABS backed by cash-generating non-financial assets, the Company also confirms that cash flows produced by the collateral are meaningful as defined in SSAP No. 26 "Bonds". The cost basis of bonds is adjusted for impairments in value deemed to be other-than-temporary, with the difference between the bond's amortized cost and its fair value recognized as a realized loss reported in net income. The new cost basis of an impaired bond is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment ("OTTI"), the impaired bond is accounted for as if it had been purchased on the measurement date of the impairment. SVO-Identified bond Exchange Traded Funds ("ETFs") are stated at fair value and reported as bonds. Refer to Note 20 - Fair Value Measurements for discussion on the valuation approach and methods for bonds.

(3) Unaffiliated common stocks are carried at fair value. Unrealized gains and losses are reflected in surplus, net of deferred taxes. The cost basis of common stocks is adjusted for impairments in value deemed to be other-than-temporary, with the difference between the common stock's cost and its fair value recognized as a realized loss reported in net income. Refer to Note 20 - Fair Value Measurements for a discussion on the valuation approach and methods for common stocks.

(4) Redeemable preferred stocks in "good standing" (NAIC designation of 1 to 3) are valued at amortized cost. Redeemable preferred stocks "not in good standing" (NAIC designation of 4 to 6) are valued at the lower of amortized cost or fair value. Perpetual preferred stock and mandatory convertible preferred stock are valued at fair value, not to exceed any currently effective call price. The cost basis of preferred stocks is adjusted for impairments in value deemed to be other-than-temporary, with the difference between the preferred stock's amortized cost and its fair value recognized as a realized loss reported in net income. Refer to Note 20 - Fair Value Measurements for discussion on the valuation approach and methods for preferred stocks.

NOTES TO FINANCIAL STATEMENTS

(5) Mortgage loans on real estate are carried at unpaid principal balances, net of discounts, premiums, deferred origination fees related to points, and specific valuation allowances, and are collateralized. Mortgage loans include residential mortgage loans held through a qualifying statutory trust as long as the trust meets the required criteria for look-through reporting stipulated in statutory accounting guidance. Specific valuation allowances are established for the excess carrying value of the mortgage loan over the estimated fair value of the collateral as an unrealized loss in surplus when it is probable that based on current information and events, the Company will be unable to collect amounts due under the contractual terms of the loan agreement. Fair value of the collateral is estimated by performing an internal or external current appraisal or by obtaining broker prices for residential mortgage loans. If impairment is deemed to be other-than-temporary, which can include a loan modification that qualifies as a troubled debt restructuring (“TDR”), a direct write-down is recognized as a realized loss reported in net income, and a new cost basis for the individual mortgage loan, which is equal to the fair value of the collateral, less costs to obtain and sell, is established. Refer to Note 20 - Fair Value Measurements for a discussion of the valuation approach and methods for mortgage loans.

Real estate includes properties that are directly-owned and real estate property investments that are directly and wholly-owned through a limited liability company and meet certain criteria. Real estate held for the production of income is stated at cost less accumulated depreciation and encumbrances. Real estate held for sale is stated at the lower of cost less accumulated depreciation or fair value, less encumbrances and estimated costs to sell. If there is an indication that the carrying amount of the real estate may not be recoverable, then it must be tested for impairment. If the carrying amount of a real estate investment exceeds its undiscounted cash flows, an OTTI is recorded as a realized loss in net income, calculated as the difference between the carrying amount of the real estate investment and the fair value of the real estate investment. Depreciation of real estate held for the production of income is calculated using the straight-line method over the estimated lives of the assets, generally 40 years. Costs of permanent improvements are depreciated over the shorter of their estimated useful life, or the remaining estimated life of the real estate. Rental revenue from leased real estate is recognized on a straight-line basis over the lease term.

(6) The interest method for asset-backed securities, which are included in bonds, uses current assumptions of projected cash flows. Amortization of premium or accretion of discount from the purchase of these securities considers the estimated timing and amount of cash flows of the underlying loans, including prepayment assumptions based on data obtained from external sources or internal estimates. Projected future cash flows are updated monthly, and the amortized cost and effective yield of the securities are adjusted as necessary to reflect historical prepayment experience and changes in estimated future prepayments. For high credit quality asset-backed securities backed by the U.S. government (those rated AA or above at the date of acquisition), the adjustments to amortized cost are recorded as a charge or credit to net investment income in accordance with the retrospective method. For all other securities, including all asset-backed securities that are not of high credit quality (those rated below AA at date of acquisition), floating rate securities and securities with the potential for a loss of a portion of the original investment due to contractual prepayments (e.g., interest only securities), the effective yield is adjusted prospectively for any changes in estimated cash flows. Refer to Note 20 - Fair Value Measurements, for discussion on the valuation approach and methods for bonds.

The cost basis of asset backed securities adjusted for impairments in value that are deemed to be other-than-temporary. An other-than-temporary loss is recognized in net income when it is anticipated that the amortized cost will not be recovered. For asset-backed securities, the entire difference between the security’s amortized cost and its fair value is recognized in net income only when the Company (a) has the intent to sell the security or (b) it does not have the intent and ability to hold the security to recovery. If neither of these two conditions exists, a realized loss is recognized in net income for the difference between the amortized cost basis of the security and the net present value of projected future cash flows expected to be collected. The net present value is calculated by discounting the Company’s best estimate of projected future cash flows at the effective interest rate implicit in the asset-backed security prior to impairment.

The new cost basis of an impaired security is not adjusted for subsequent increases in estimated fair value. In periods subsequent to the recognition of an other-than-temporary impairment ("OTTI"), the impaired bond security is accounted for as if it had been purchased on the measurement date of the impairment. Accordingly, the discount (or reduced premium) based on the new cost basis may be accreted (or amortized) into net investment income in future periods based on prospective changes in cash flow estimates, to reflect adjustments to the effective yield.

(7) Investments in subsidiaries are stated as follows: (1) domestic insurance subsidiaries are stated at the value of their underlying U.S. statutory surplus; (2) foreign insurance subsidiaries that have U.S. generally accepted accounting principles (“U.S. GAAP”) audits are stated at U.S. GAAP equity adjusted for certain assets that are disallowed under statutory accounting practices, otherwise, the investment is nonadmitted; (3) non-insurance subsidiaries are carried at U.S. GAAP equity, unless they are engaged in certain transactions that are for the benefit of the Company or its affiliates and receive 20% or more of their revenue from the Company or its affiliates. In this case, non-insurance subsidiaries are carried at U.S. GAAP equity adjusted for the same items as foreign insurance subsidiaries; (4) all other assets and liabilities in a downstream holding company are accounted for in accordance with the appropriate U.S. statutory guidance. Dividends and distributions from subsidiaries are recorded as a component of net investment income when declared and changes in the equity of subsidiaries (both in the form of common stock and limited liability companies ("LLCs")) are recorded as unrealized gains or losses in surplus, net of deferred taxes. In the absence of an admissible audit, the entire investment is nonadmitted.

(8) Investments in limited partnerships and limited liability companies, including equity investments in affiliated entities organized as limited liability companies, which have admissible audits are carried at the underlying audited equity of the investee. In the absence of an admissible audit, the entire investment is nonadmitted. The financial statements of equity method investees are usually not received in time for the Company to apply the equity method at each reporting period. Therefore, the equity pick-up on these investments has been recorded on a one to three-month lag.

The cost basis of limited partnerships and limited liability companies is adjusted for impairments in value deemed to be other-than-temporary, with the difference between cost and carrying value, which approximates fair value, recognized as a realized loss reported in net income. The new cost basis of an impaired limited partnership or limited liability company is not adjusted for subsequent increases in the underlying audited equity of the investee.

Dividends and distributions from limited partnerships and limited liability companies, other than those deemed a return of capital, are recorded in net investment income. Undistributed earnings are included in unrealized gains and losses and are reflected in surplus, net of deferred taxes.

Investments in tax credit structures, including Low Income Housing Tax Credit (“LIHTC”) LLCs, wind energy LLCs and New Market Tax Credit ("NMTC") LLCs, which are included in other invested assets, are recorded at proportional amortized cost and include remaining unfunded commitments. The carrying value of the investment is amortized into income in proportion to the actual and projected future amounts of tax credits and deductible losses. The amortization is recorded through net investment income.

Effective October 1, 2024, residual tranches of securitizations are reported using a cost recovery method, which is a practical expedient allowed under statutory accounting rules. Under the cost recovery method, distributions received are treated as a reduction of the residual's book value. Investment income is not recognized until the book value of the residual has been reduced to zero. An OTTI is recorded when fair value of the residual is below its book value. Prior to October 1, 2024, most residuals were reported at the lower of cost or market and income was accrued using an effective yield method.

NOTES TO FINANCIAL STATEMENTS

(9) Derivative instruments that qualify and are designated for hedge accounting are valued in a manner consistent with the items being hedged. Periodic payments and receipts on these derivatives are recorded on an accrual basis within net investment income for hedges of fixed income securities, and within other income for hedges of liabilities. Net realized gains and losses are recognized upon termination or maturity of these contracts in a manner consistent with the hedged item and when subject to the IMR, are transferred to the IMR, net of taxes.

Derivative instruments that do not qualify or are not designated for hedge accounting are carried at fair value and changes in fair value are recorded in surplus as unrealized gains and losses, net of deferred taxes. Periodic payments and receipts on these derivatives are recorded on an accrual basis within net investment income for hedges of fixed income securities and within other income for hedges of liabilities Upon termination or maturity, the gains or losses on these contracts are recognized in net realized capital gains and losses, net of taxes. Realized gains or losses on terminated or matured derivatives, which are subject to the IMR, are transferred to the IMR, net of taxes.

The Company also uses derivatives as part of replication transactions. Replication transactions refer to derivative transactions entered into in conjunction with other investments in order to reproduce the investment characteristics of otherwise permissible investments. The accounting for derivatives used in replication transactions depends upon how the underlying cash instrument is accounted for, as well as how the replicated asset would be accounted for if acquired directly; alternatively, the Company can elect to carry the derivative at fair value. The Company uses bonds as the referenced cash instrument in its current replication transactions, and therefore, the derivatives are carried at amortized cost. The Company accrues investment income for the replicated synthetic asset throughout the life of the replication transaction. Realized gains or losses at maturity of the replication transaction, which are subject to the IMR, are transferred to the IMR, net of tax.

The Company reports cash flows from the purchase or termination of derivative instruments as cash flows from investing activities unless there is a significant financing element. Income payments, which include all cash settlements and foreign exchange payments are classified as cash flows from operating activities. Changes in receivables and payables related to collateral are reported in investing activities.

(10) - (11) The Company does not issue or have in-force of any accident and health policies.

(12) The Company has not changed its capitalization policy from the prior year.

(13) The Company does not have any pharmaceutical rebates receivable.

D. Going Concern

The Company does not have any doubt about its ability to continue as a going concern.

2. Accounting Changes and Corrections of Errors

Changes in Accounting Principles

Accounting changes adopted to conform to the provisions of NAIC SAP or other state prescribed accounting practices are reported as changes in accounting principles. The cumulative effect of changes in accounting principles is generally reported as an adjustment to unassigned surplus in the period of the change in accounting principle. Generally, the cumulative effect is the difference between the amount of capital and surplus at the beginning of the year and the amount of capital and surplus that would have been reported at that date if the new accounting principles had been applied retroactively for all prior periods.

During 2025, the NAIC adopted revisions to SSAP No. 93 "Investments in Tax Credit Structures" to provide new guidance on the accounting, recognition, and reporting of investments where the return is substantially earned through either federal or state tax credits. Specifically, the guidance requires for all qualifying tax credit investments to be reported as Other Invested Assets on Schedule BA and accounted for under the proportional amortization method. Revisions were also made to SSAP No. 94 "State and Federal Tax Credits", which clarifies the accounting guidance for certificated tax credits and expands the current guidance to federal tax credits, while continuing to include state tax credits. The guidance also requires these tax credits to be recorded at face value, with any discount to the certificated tax credits' face value recorded as a deferred gain. The Company adopted the new guidance on January 1, 2025. Upon adoption, there was no significant impact to the Company’s surplus.

During 2025, the NAIC adopted revisions to SSAP No. 26 “Bonds” to incorporate a principle-based bond definition. Revisions were also made to SSAP No. 43 “Asset Backed Securities” and SSAP No. 21 “Other Admitted Assets”. The revised definition includes criteria that must be met in order for a debt instrument to be reported as a bond, classified as either an issuer credit obligation or asset-backed security. The Company adopted the new guidance on January 1, 2025. Upon adoption, the Company identified debt securities with a book adjusted carrying value ("BACV") of $441,245,084 and $13,227,503 for the general account and book value separate accounts, respectively, that no longer met the definition of a bond. These debt securities were reclassified to either preferred stock or other invested assets. Prior to adoption of the new definition, these debt securities were carried at amortized cost unless they had an NAIC-6 designation, which required lower of cost or market ("LOCOM") accounting. Details regarding these securities' BACV and accounting measurement before and post adoption are as follows:

General Account:

Non-Bond Debt Securities	BACV at 12/31/24 as reported on Schedule D	New measurement Basis	BACV at 1/1/25 After Transition	Aggregate surplus impact after transition at 1/1/25
Debt securities reclassified to preferred stock	$ 236,372,885	Fair Value	229,015,397	(7,357,488)
Debt securities reclassified to other invested assets - (Non-Bond Debt Securities)	$ 83,435,420	LOCOM	65,236,246	(18,199,174)
Debt securities reclassified to other invested assets - (Capital Notes)	$ 121,436,779	Amortized cost if NAIC 1-2; LOCOM if NAIC 3-6	121,436,779	—
Total	$ 441,245,084		$ 415,688,422	$ (25,556,662)

NOTES TO FINANCIAL STATEMENTS

During 2024, the NAIC adopted changes to SSAP No. 21 "Other Admitted Assets," which revise the accounting guidance for residual tranches of securitizations. The new guidance provides a practical expedient that allows for the use of a cost recovery method. Under the cost recovery method, distributions received from the investment are treated as a reduction of the residual's book value. Investment income is not recognized until the book value of the residual has been reduced to zero. The Company early adopted the new guidance on a prospective basis on October 1, 2024. There was no impact to surplus upon adoption. The Company reclassified $1,473,576 from unrealized gains to realized gains upon adoption.

The NAIC adopted changes to SSAP No. 56 "Separate Accounts" to clarify the definition of a book value separate account and to include accounting guidance for transfers between the general account and the separate accounts. New disclosures are also required. The Company early adopted this guidance as of December 31, 2025, which did not have any financial impact.

During 2023, the NAIC adopted revisions to SSAP No. 48 "Joint Ventures, Partnerships and Limited Liability Companies", SSAP No. 30 "Common Stock" and SSAP No. 32 "Preferred Stock" regarding residual investments. The amended guidance clarified that equity investments issued from entities that are in substance securitization vehicles are to be reported as residual investments. The adoption of this guidance had no impact to the Company's surplus, but required the reclassification of $3,194,165 million at December 31, 2023 of investments in limited partnerships as residual investments.

In 2023, the NAIC adopted Interpretation ("INT") 23-01, which prescribes limited-time, optional, statutory accounting guidance as an exception to the existing guidance detailed in SSAP No. 7 “Asset Valuation Reserve and Interest Maintenance Reserve” and the annual statement instructions that requires non-admittance of a negative IMR. Under the INT, reporting entities are allowed to admit negative IMR if certain criteria are met. The adoption of this guidance allowed the Company to admit $458,848,705 (including $17,329,645 from Separate Accounts) and $327,970,902 of negative IMR at December 31, 2025 and December 31, 2024, respectively, which increased the Company's total assets. There was no impact to net income from this change. New disclosures required under the INT have been included in Note 5 - Investments

In 2023, the NAIC adopted revisions to SSAP No. 86 “Derivatives”, which adopt with modification U.S. GAAP guidance in determining hedge effectiveness. More specifically, SSAP No. 86 was modified to incorporate measurement guidance for excluded components when measuring hedge effectiveness of foreign currency swaps and foreign currency forwards. In addition, new guidance was added regarding the portfolio layer method and partial term hedges for fair value hedges. The Company adopted this guidance on January 1, 2023 with no impact to surplus at adoption. New disclosures related to this guidance were added to Note 8 - Derivative Instruments.

Changes in Accounting Policy

On September 30, 2024, the Company changed its accounting policy on the reporting of premiums and benefits on internal replacement transactions. Internal replacements refer to transactions whereby a policyholder transfers the cash surrender value from their current policy into a similar policy. Premiums and benefits from these types of exchanges are now reported gross in the statement of operations. Our previous policy, which was discussed with the Department and to which they had no objection, was to net the benefit expense against the premium income in the statement of operations.Through December 31, 2024, premium income and benefit expense include $4,011,088,312 from internal replacements. If this policy was in effect for 2023, premium income and benefit expense would have been $3,982,291,382 higher from internal replacements.This change in accounting policy has no net impact on the Company’s profit or loss, nor does it affect surplus, as the gross reporting of premiums and benefits is offset by corresponding amounts in both income and expense.

Change in Reserve Valuation Basis

In 2025, the Department granted approval for the Company to change the reserve valuation basis for fixed deferred annuities to the Standard Valuation Law ("SVL"). Prior to this change, reserves for fixed deferred annuities with market value adjustments were computed in accordance with the minimum statutory reserve standard under the New York State Department of Financial Services ("NYSDFS") Regulation 127, which required the use of Plan Type C valuation rates. Under the SVL, which is the Delaware minimum reserve standard, these contracts are valued using Plan Type B rates. At December 31, 2025, the impact of this change in reserve valuation basis resulted in a reduction in policy reserves and a corresponding increase in statutory surplus of $51,326,861.

In 2024, the Delaware State Insurance Department (DSID) granted approval for the Company to change the reserve valuation basis for the variable deferred annuity policies to the NAIC valuation basis (VM-21). Prior to this change, reserves for these policies were computed in accordance with the minimum statutory reserve standard required under New York law, which results in reserves that are higher than those computed pursuant to the NAIC basis (VM-21), which is the Delaware minimum reserve standard. For the index-linked account corresponding to a variable annuity product, the Company still applies Actuarial Guideline XXXV. As of December 31, 2024, the impact of this change in reserve valuation basis resulted in a reduction of the aggregate reserve for life contracts by $46,846,231 and an increase in Expense Allowances recognized in Reserves (included in Transfers to Separate Accounts due or accrued) of $135,978,361, thereby increasing the statutory surplus by $182,824,592 (see Summary of Operations – Page 4 – Line 43).

(9) The Company accrues interest income on mortgage loans to the extent it is deemed collectible. The Company places loans on non-accrual status and ceases to recognize interest income when management determines that the collection of interest and repayment of principal is not probable. Any accrued but uncollected interest is reversed out of interest income once a loan is put on non-accrual status. Interest payments received on mortgage loans where interest payments have been deemed uncollectible are recognized on a cash basis and recorded as interest income. If a determination is made that the principal will not be collected, the interest payment received is used to reduce the principal balance. If a mortgage loan has any investment income due and accrued that is 90 days past due and collectible, the investment income will continue to accrue but all accrued interest related to the mortgage loan is reported as a nonadmitted asset, until such time that it has been paid or is deemed uncollectible.

(10) In 2025, the Company started investing in residential mortgage loans through a Delaware Statutory Trust (the “Trust”). The Trust owns residential mortgages in three separate series. The Company, along with NYL and LINA, own a 100% undivided beneficial ownership in the assets of one of the series. At December 31, 2025, the Company’s investment in residential mortgages and cash owned through the Trust are as follows:

B. Debt Restructuring

A restructuring is considered a TDR when a debtor is experiencing financial difficulties and the Company has granted a concession. The Company had the following restructured debt in the general account for which it is the creditor:

	General Account		Separate Account	
	December 31, 2025	December 31, 2024	December 31, 2025	December 31, 2024
(1) The total recorded investment in restructured debt, as of year-end	$ 21,913,837	$ 60,125,626	$ 1,711,299	$ 1,711,080
(2) The realized capital losses (gains) related to this debt	$ 2,998,140	$ 32,190,869	$ (219)	$ 1,057,058
(3) Total contractual commitments to extend credit to debtors owing receivables whose terms have been modified in TDR	$ —	$ —	$ —	$ —

(4) The Company accrues interest income on impaired debt instruments to the extent it is deemed collectible (delinquent less than 90 days) and the debt instrument continues to perform under its original or restructured contractual terms. Interest income on non-performing debt instruments is generally recognized on a cash basis.

C. Reverse Mortgages

The Company does not have any reverse mortgages.

D. Asset Backed Securities

(1) Prepayment assumptions for mortgage-backed/asset backed securities were obtained from external sources such as Intex and Blackrock Solutions.

(2) The Company does not have any asset backed securities, which are other-than-temporarily impaired where the Company intends to sell, or does not have the intent and ability to hold until recovery, at December 31, 2025.

(3) The following table lists each security at a CUSIP level where the present value of cash flows expected to be collected is less than the amortized cost basis during the year:

[1] Only the impaired lots within each CUSIP are included within this table.

(4) The following table presents the Company's gross unrealized losses and fair values for asset backed securities, aggregated by the length of time that the individual securities have been in a continuous unrealized loss position at December 31, 2025:

	Less than 12 Months		12 Months or Greater		Total	
	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses	Estimated Fair Value	Unrealized Losses
General Account	$ 2,992,554,669	$ 62,157,007	$12,854,834,175	$ 1,227,969,525	$15,847,388,843	$ 1,290,126,532
Guaranteed Separate Accounts	113,597,632	1,988,284	835,625,277	102,611,794	949,222,909	104,600,078
Total	$ 3,106,152,301	$ 64,145,291	$13,690,459,452	$ 1,330,581,319	$16,796,611,752	$ 1,394,726,610

(5) The Company performs quantitative and qualitative analysis to determine if a decline in fair value was temporary. For those securities where the decline was considered temporary, the Company did not take an impairment when it had the ability and intent to hold until recovery. Factors considered in evaluating whether a decline in value is other-than-temporary include: (1) whether the decline is substantial; (2) the duration that the fair value has been less than amortized cost; (3) the financial condition and near-term prospects of the issuer; and (4) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value. In addition, for the non-agency residential mortgage backed securities ("RMBS") portfolio, the Company updates cash flow projections quarterly. A projection is performed for each security based upon the evaluation of prepayment, delinquency, and default rates for the pool of mortgages collateralizing each security, and the projected impact on the course of future prepayments, defaults, and loss in the pool of mortgages, but do not include market prices. As a result, forecasts may change from period to period and additional impairments may be recognized over time as a result of deterioration in the fundamentals of a particular security or group of securities and/or a continuation of heightened mortgage defaults for a period longer than the assumptions used for the forecasts. Both qualitative and quantitative factors are used in creating the Company's RMBS cash flow models. As such, any estimate of impairments is subject to the inherent limitation on the Company's ability to predict the aggregate course of future events. It should therefore be expected that actual losses may vary from any estimate and the Company may recognize additional other-than-temporary losses.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

(1) The Company enters into dollar roll repurchase agreements to sell and repurchase securities. Assets to be repurchased are the same, or substantially the same, as the assets sold. The Company agrees to sell securities at a specified price and repurchase the securities at a lower price. The Company receives cash in the amount of the sales proceeds and establishes a liability equal to the repurchase amount. The difference between the sale and repurchase amounts represents deferred income which is earned over the life of the agreement. The liability for repurchasing the assets is included in borrowed money on Page 3 – Liabilities, Surplus and Other Funds.

(2) The Company enters into securities lending agreements whereby certain investment securities are loaned to third-parties With respect to securities loaned, in order to reduce the Company's risk under these transactions, the Company requires initial cash collateral equal to 102% of the fair value of domestic securities loaned. The Company records an offsetting liability in amounts payable under security lending agreements on Page 3 – Liabilities, Surplus and Other Funds. The Company monitors the fair value of securities loaned with additional collateral obtained as necessary. The borrower of the loaned securities is permitted to sell or repledge those securities.

b. To help manage the mismatch of maturity dates between the security lending transactions and the related reinvestment of the collateral received, the Company invests in highly liquid assets.

(6) The Company has not accepted collateral that is not permitted by contract or custom to sell or repledge except as explained above in section (2). In the case of tri-party repurchase agreements, the collateral is kept by the custodian and is not recorded on the Company's financial statements. The Company is not permitted to sell the collateral except in the case of a counterparty default.

(7) The Company does not have any collateral or transactions for securities lending that extend beyond one year from December 31, 2025.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

Not applicable.

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) The Company enters into tri-party reverse repurchase agreements to purchase and resell short-term securities. The Company receives securities as collateral, having a fair value at least equal to 102% of the purchase price paid by the Company for the securities and the Company's designated custodian takes possession of this collateral. The Company is not permitted to sell or repledge these securities. The collateral is not recorded on the Company's financial statements. However, if the counterparty defaults, the Company would then exercise its rights with respect to the collateral, including a sale of the collateral. The fair value of the securities held as collateral is monitored daily and additional collateral is obtained, where appropriate, to protect against credit exposure. The Company records the amount paid for securities purchased under agreements to resell in cash, cash equivalents and short-term investments.

At December 31, 2025, the carrying value and fair value of securities held under agreements to purchase and resell was $510,045,001, which were classified as tri-party reverse repurchase agreements and included with cash, cash equivalents and short-term investments on Page 2 - Assets. The securities had a weighted average maturity of 2 days and a weighted average yield of 3.8%.

8. Derivative Instruments

A. Derivatives under SSAP No. 86 - Derivatives

(1)-(3) The Company uses derivative instruments to manage interest rate, equity and currency risk, and to replicate otherwise permissible investments. These derivative instruments include foreign currency and bond forwards, interest rate and equity options, interest rate and equity futures, interest rate, total return, credit default and foreign currency swaps. The Company does not engage in derivative instrument transactions for speculative purposes.

Interest Rate Risk Management

The Company enters into interest rate derivatives primarily to minimize exposure to fluctuations in interest rates on assets and liabilities held by the Company.

Interest rate swaps are used by the Company to hedge interest rate risk for individual and portfolios of assets. Interest rate swaps are agreements with other parties to exchange, at specified intervals, the difference between interest amounts calculated by reference to an agreed upon notional value. Generally, no cash is exchanged at the onset of the contract and no principal payments are made by either party. The Company does not act as an intermediary or broker in interest rate swaps. At December 31, 2025, the Company had interest rate swaps with a fair value of $84,244,995 and a carrying value of $83,638,852. Interest rate swaps which qualify and are designated as cash flow hedges are used by the Company to convert floating rate assets to fixed rate assets. These interest rate swaps are valued and reported in a manner consistent with the hedged asset.

Interest rate (Treasury) futures are used by the Company to hedge reinvestment risk of the Company's fixed income portfolio. Interest rate futures are exchange traded contracts to buy or sell a bond at a specific price at a future date. At December 31, 2025, the Company had interest rate futures with a fair value and carrying value of $(277,272).

Interest rate options are used by the Company to hedge the risk of increasing interest rates on policyholder liabilities. These contracts include Interest Rate Caps and Swaptions. Interest Rate Caps allow the Company to receive payments from counterparties should an agreed upon interest rate level be reached. Interest Rate Swaptions give the Company an option, but not an obligation to take delivery of an interest rate swap at a predetermined fixed rate and tenor or to cash settle for value. At December 31, 2025, the Company had interest rate options with a fair value and carrying value of $1,174,110.

The Company had no bond forwards at December 31, 2025

Currency Risk Management

The primary purpose of the Company’s foreign currency hedging activities is to protect the value of foreign currency denominated assets from the risk of changes in foreign exchange rates.

Foreign currency swaps are agreements with other parties to exchange, at specified intervals, principal and interest in one currency for the same in another, at a fixed exchange rate, which is generally set at inception and calculated by reference to an agreed upon notional value. Generally, only principal payments are exchanged at the onset and the end of the contract. At December 31, 2025, the Company had foreign currency swaps with a fair value of $247,117,374 and a carrying value of $17,172,964.

Foreign currency forwards involve the exchange of foreign currencies at a specified future date and at a specified price. No cash is exchanged at the time the agreement is entered into. At December 31, 2025, the Company had foreign currency forwards with a fair value of and a carrying value of $(3,709,034).

Equity Risk Management

The Company purchases equity options to minimize exposure to the equity risk associated with guarantees on certain underlying policyholder liabilities. There are upfront fees paid related to option contracts at the time the agreements are entered into. At December 31, 2025, the Company had equity options with a fair value and carrying value of $497,981,121.

The Company enters into equity futures transactions to hedge equity exposure in the general account portfolio. At December 31, 2025, the Company had equity futures with a fair value of $(133,300).

Credit Risk Management

Not applicable.

Income Generation Transactions

Not applicable.

NOTES TO FINANCIAL STATEMENTS

Replication Transactions

Bond forwards are paired with other investment grade bonds in replication transactions to generate the return and price risk of long-dated fixed income securities. At December 31, 2025, the Company held no bond forwards used in replications.

Interest rate swaps are paired with floating rate bonds in replication transactions to generate the return and price risk of fixed rate coupon securities At December 31, 2025, the Company held interest rate swaps that were part of a replication with a fair value of $7,743,207 and carrying value of $229.

Credit default swaps are paired with investment grade bonds in replication transactions to generate the return and price risk of long dated corporate bonds. At December 31, 2025, the Company held credit default swaps with a fair value of $11,329,126 and a carrying value of $5,832,011.

Hedge Effectiveness

To qualify for hedge accounting, the hedge relationship is designated and formally documented at inception detailing the particular risk management objective and strategy for the hedge, including the item and risk that is being hedged, the derivative that is being used, and how effectiveness is assessed.

A derivative must be highly effective in accomplishing the objective of offsetting either changes in fair value or cash flows for the risk being hedged. The Company formally assesses effectiveness of its hedging relationships both at hedge inception and on an ongoing basis in accordance with its risk management policy. The hedging relationship is considered highly effective if the changes in fair value or discounted cash flows of the hedging instrument are within 80-125% of the inverse changes in the fair value or discounted cash flows of the hedged item.

The Company discontinues hedge accounting prospectively if: (1) it is determined that the derivative is no longer highly effective in offsetting changes in the fair value or cash flows of a hedged item, (2) the derivative expires or is sold, terminated, or exercised, (3) it is probable that the forecasted transaction for which the hedge was entered into will not occur, or (4) management determines that designation of the derivative as a hedge instrument is no longer appropriate.

(4) The Company had no derivative contracts with financing premiums for the year ended December 31, 2025

(5) The Company only excludes the cross currency basis spread in its foreign currency swaps from the assessment of effectiveness. As required under SSAP No. 86, the Company reports the impact of the cross-currency basis spread in its designated cross currency swaps as a component of the swap's periodic interest accrual instead of through surplus.

(6) The Company has net gains of $3,197,163 recognized in unrealized gains and losses during the reporting period resulting from derivatives that no longer qualify for hedge accounting.

(7) The Company reports cash flows from the purchase or termination of derivative instruments as cash flows from investing activities unless there is a significant financing element. Income payments, which include all cash settlements and foreign exchange payments are classified as cash flows from operating activities. Changes in receivables and payables related to collateral are reported in investing activities.

(8) Not applicable.

(9) The Company excludes the cross-currency basis spread in its foreign currency swaps from the assessment of effectiveness as allowed under SSAP No. 86. The fair value of the cross-currency basis spread on the Company's foreign currency swaps, which was excluded from the assessment of effectiveness at December 31, 2025 was $229,270,166.

B. Derivatives under SSAP No. 108 - Derivatives Hedging Variable Annuity Guarantees

Not applicable.

Unfunded commitments on limited partnerships, limited liability companies and other invested assets amounted to $1,797,819,582 at December 31, 2025. Included in the total unfunded commitments is $98,224,693 related to commitments in tax credit structures.

At December 31, 2025, the Company and its guaranteed separate accounts had contractual commitments to extend credit for commercial mortgage loans totaling $1,473,448,390 at both fixed and variable rates of interest. These commitments are diversified by property type and geographic location. There were no contractual commitments to extend credit under residential loan agreements at December 31, 2025.

Prior to July 1, 2002, the Company did business in Taiwan through a branch operation (the "Taiwan Branch"). On July 1. 2002, the Taiwan Branch ceased operations and all of its liabilities and assets, including policy liabilities, were transferred to New York Life Insurance Taiwan Corporation ("Taiwan Corporation"), an indirect subsidiary of New York Life. On December 31, 2013, Taiwan Corporation was sold to Yuanta Financial Holding Co. Ltd. ("Yuanta"). Under the terms of the sale agreement, Yuanta has agreed to satisfy in full, or to cause Taiwan Corporation to satisfy in full, all of Taiwan Corporation's obligations under the Taiwan Branch policies that were transferred to Taiwan Corporation on July 1, 2002. However, the Company, under Taiwan law, also remains contingently liable for these policies in the event that neither Taiwan Corporation nor Yuanta meets its obligations. This contingent liability of the Company has not been recognized in Page 3 - Liabilities, Surplus, and Other Funds because it does not meet the probable and estimable criteria of SSAP No. 5R.

(2)-(3) Not applicable.

B. Assessments

(1) Most of the jurisdictions in which the Company is licensed to transact business require life insurers to participate in guaranty associations which are organized to pay contractual benefits pursuant to insurance policies issued by impaired, insolvent or failed life insurers. These associations levy assessments, up to prescribed limits, on all member insurers in a particular state on the basis of the proportionate share of the premiums written by member insurers in the line of business in which the impaired, insolvent or failed life insurer is engaged. Some states permit member insurers to recover assessments through full or partial premium tax offsets.

The Company recorded guaranty fund receivables of $1,096,547 and $3,698,898 at December 31, 2025 and 2024, respectively. The Company recorded guaranty fund liabilities of $6,390,759 and $9,632,723 at December 31, 2025 and 2024, respectively.

The Company has received notification of the insolvency of various life insurers. It is expected that these insolvencies will result in non-recoverable guaranty fund assessments against the Company of $5,294,212, which have been accrued in the financial statements.

(3) Long-term care guarantee fund assessments

Not applicable.

C. Gain Contingencies

Not applicable.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits

The Company's exposure to extra contractual obligations and bad faith losses is immaterial.

E. Joint and Several Liabilities

Not applicable.

F. All Other Contingencies

The Company is a defendant in individual and/or alleged class action suits arising from their agency sales force, insurance (including variable contracts registered under the federal securities law), investment, retail securities, employment and/or other operations, including actions involving retail sales practices. Some of the actions seek substantial or unspecified compensatory and punitive damages. The Company is also from time to time involved in various governmental, administrative, and investigative proceedings and inquiries.

Notwithstanding the uncertain nature of litigation and regulatory inquiries, the outcome of which cannot be predicted, the Company believes that, after provisions made in the financial statements, the ultimate liability that could result from litigation and proceedings would not have a material adverse effect on the Company's financial position; however, it is possible that settlements or adverse determinations in one or more actions or other proceedings in the future could have a material adverse effect on the Company's operating results for a given year.

Several commercial banks have customary security interests in certain assets of the Company to secure potential overdrafts and other liabilities of the Company that may arise under custody, securities lending and other banking agreements with such banks.

Based upon Company experience, the amount of premiums and other accounts receivable that may become uncollectible and result in a potential loss is not material to the Company's financial condition.

A. Lessee Operating Lease

(1)a-(3)b Not applicable.

B. Lessor Leases

Not applicable.

16. Information About Financial Instruments with Off-Balance Sheet Risk and Financial Instruments with Concentrations of Credit Risk

(1) The following table summarizes the notional amount of the Company's financial instruments with off-balance sheet risk (derivative instruments that qualify for hedge accounting):

	Assets		Liabilities	
	2025	2024	2025	2024
Foreign currency swaps	$ 3,066,998,261	$ 4,411,615,090	$ 3,034,301,623	$ 750,273,639
Interest rate swaps	1,366,500,000	111,500,000	550,000,000	150,000,000
Foreign currency forwards	—	—	—	—

CD swaps	706,000,000	275,000,000	—	—
Total	$ 5,139,498,261	$ 4,798,115,090	$ 3,584,301,623	$ 900,273,639

Refer to Schedule DB of the Company's annual statement for additional details.

(2) Refer to Note 8 ("Derivative Instruments") for a description of the Company's derivatives.

(3) The Company may enter into exchange traded futures and over-the-counter ("OTC") derivative instruments. Exchange traded derivatives are executed through regulated exchanges and require initial and daily variation margin collateral postings. The Company is exposed to credit risk resulting from default of the exchange.

OTC derivatives may either be cleared through a clearinghouse ("OTC-cleared") or transacted between the Company and a counterparty under bilateral agreements ("OTC-bilateral"). Similar to exchange traded futures, OTC-cleared derivatives require initial and daily variation margin collateral postings. When transacting OTC-cleared derivatives, the Company is exposed to credit risk resulting from default of the clearinghouse and/or default of the Futures Commission Merchant (e.g. clearinghouse agent).

For OTC-bilateral derivatives, the Company obtains collateral in accordance with the terms of credit support annexes ("CSAs") negotiated as part of the master agreements entered into with most OTC-bilateral counterparties. CSAs define the terms under which collateral is transferred between the parties in order to mitigate credit risk arising from "in the money" derivative positions. The VM CSA requires that an OTC-bilateral counterparty post collateral to secure its anticipated derivative obligation, taking into account netting arrangements.

NOTES TO FINANCIAL STATEMENTS

Under federal regulation that became effective on September 1, 2021, additional margin is required to be posted to and collected from counterparties to OTC-bilateral derivatives to cover market movements over a ten day close-out period. This "initial margin" is documented under its own IM CSA and amounts posted under the IM CSA must be maintained at a third-party custodian, without any right of rehypothecation. In addition, certain of the Company's agreements require that if the Company's (or its counterparty's) credit rating were to fall below a specified rating assigned by a credit rating agency, the other party could request immediate payout on all transactions under the agreements or full collateralization of the positions thereunder. Cash collateral is invested in short-term investments.

The Company may be exposed to credit-related losses in the event that an OTC-bilateral counterparty fails to perform its obligations under its contractual terms. In contractual arrangements with OTC-bilateral counterparties that do not include netting provisions, in the event of default, credit exposure is limited to the positive fair value of derivatives at the reporting date. In contractual arrangements with OTC-bilateral counterparties that include netting provisions, in the event of default, credit exposure is limited to the net fair value, if positive, of all derivatives at the reporting date.

Refer to Schedule DB of the Company's annual statement for additional details.

(4) The Company manages its credit risk by entering into transactions with creditworthy counterparties, using master netting arrangements, and obtaining collateral where appropriate. All of the net credit exposure for the Company from derivatives transactions is with investment-grade counterparties. For OTC-cleared and exchange traded derivatives, the Company obtains collateral through variation margin which is adjusted daily based on the parties' net derivative position.

For OTC-bilateral derivatives, the Company obtains collateral in accordance with the terms of credit support annexes ("CSAs") negotiated as part of the master agreements entered into with most OTC-bilateral counterparties. In addition, certain of the Company's contracts require that if the Company's (or its counterparty's) credit rating were to fall below a specified rating assigned by a credit rating agency, the other party could request immediate payout on all transactions under the contracts or full collateralization of the positions thereunder.

Cash collateral is invested in short-term investments.

17. Sale, Transfer and Servicing of Financial Assets and Extinguishments of Liabilities

A. Transfers of Receivables Reported as Sales

Not applicable.

B. Transfer and Servicing of Financial Assets

(1) The Company participates in securities lending programs whereby securities, which are included in investments, are loaned to third-parties for the purpose of enhancing income on securities held through reinvestment of cash collateral received upon lending. For securities lending transactions, the Company requires initial collateral, usually in the form of cash, equal to 102% of the fair value of domestic securities loaned. The borrower of the loaned securities is permitted to sell or repledge those securities. For securities lending transactions, the carrying value of securities classified as bonds and on loan at December 31, 2025 was $982,904,833 with a fair value of $975,355,390. The Company recorded cash collateral received under these agreements of $1,000,000,000 and established a corresponding liability for the same amount, which is included in payable for securities lending on Page 3 – Liabilities, Surplus and Other Funds. At December 31, 2025, there were no separate accounts securities lending arrangements.

The Company participates in dollar repurchase agreements to sell and repurchase securities. The purchaser of the securities is permitted to sell or repledge those securities. At December 31, 2025, the Company's general account and separate accounts did not enter into any dollar repurchase agreements.

(2)-(7) Not applicable.

C. Wash Sales

(1) In the course of the Company's investment management activities, securities may be sold and repurchased within 30 days of the sale date to meet individual portfolio objectives and to achieve the ongoing rebalancing of exposure.

(2) The Company did not have any wash sales where securities with an NAIC rating designation of 3 or below, or unrated, were sold during the year ended December 31, 2025 and reacquired within 30 days of the sale date are as follows:
-

18. Gain or Loss to the Reporting Entity from Uninsured Plans and the Uninsured Portion of Partially Insured Plans

Not applicable.

19. Direct Premium Written/Produced by Managing General Agents/Third-Party Administrators

The Company did not have any direct premium written/produced by a single managing general agent/third-party administrator equal to or greater than 5% of surplus during 2025.

20. Fair Value Measurements

A. The Company's financial assets and liabilities carried at fair value have been classified, for disclosure purposes, based on a hierarchy defined by SSAP No. 100, "Fair Value Measurements". Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This guidance establishes a framework for measuring fair value that includes a hierarchy used to classify the inputs used in measuring fair value. The hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement.

(1) The levels of the fair value hierarchy are based on the inputs to the valuation as follows:

Level 1 Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market. Active markets are defined as a market in which many transactions occur with sufficient frequency and volume to provide pricing information on an ongoing basis.

NOTES TO FINANCIAL STATEMENTS

Level 2 Observable inputs other than level 1 prices, such as quoted prices in active markets for similar assets or liabilities; quoted prices in markets that are not active for identical or similar assets or liabilities, or other model driven inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Valuations are generally obtained from third-party pricing services for identical or comparable assets or liabilities or through the use of valuation methodologies using observable market inputs.

Level 3 Instruments whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs reflect management's own assumptions in pricing the asset or liability. Pricing may also be based upon broker quotes that do not represent an offer to transact. Prices are determined using valuation methodologies such as option pricing models, discounted cash flow models and other similar techniques. Non-binding broker quotes, which are utilized when pricing service information is not available, are reviewed for reasonableness based on the Company's understanding of the market, and are generally considered Level 3. To the extent the internally developed valuations use significant unobservable inputs, they are classified as Level 3.

The following table represents the balances of assets and liabilities measured at fair value or net asset value ("NAV") as of December 31, 2025:

		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Net Asset Value (NAV)	Total

NOTES TO FINANCIAL STATEMENTS

Transfers between levels

Transfers between levels may occur due to changes in valuation sources, or changes in the availability of market observable inputs, which generally are caused by changes in market conditions such as liquidity, trading volume or bid-ask spreads, or as a result of a security measured at amortized cost at the beginning of the period, but measured at estimated fair value at the end of the period, or vice versa due to a ratings downgrade or upgrade.

Transfers into and out of Level 3

The Company's basis for transferring assets and liabilities into and out of Level 3 is based on changes in the observability of data, a change in the security's measurement or changes in redemption restrictions of certain separate account investments

Transfers into Level 3 totaled $1,211,993 for the year ended December 31, 2025, primarily due to a change in the price source for common stock resulting from a corporate action.Transfers out of Level 3 totaled $50,828,318 for the same period, consisting of $28,099,882 related to the conversion of preferred stock to common stock, which resulted in a transfer to Level 1, and a additional $22,728,436 related to other invested assets that were measured at fair value at the beginning of the period and measured at amortized cost at the end of the period.

(4)-(5) Determination of Fair Value

The Company has an established and well-documented process for determining fair value. Security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services. For most private placement securities, the Company applies a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. For private placement securities that cannot be priced through these processes, the Company uses internal models and calculations. All other securities are submitted to independent brokers for prices. The Company performs various analyses to ascertain that the prices represent fair value. Examples of procedures performed include, but are not limited to, back testing recent trades, monitoring trading volumes, and performing variance analysis of monthly price changes using different thresholds based on asset type. The Company also performs an annual review of all third-party pricing services. During this review, the Company obtains an understanding of the process and sources used by the pricing service to ensure that they maximize the use of observable inputs, the pricing service's frequency of updating prices, and the controls that the pricing service uses to ensure that their prices reflect market assumptions. The Company also selects a sample of securities and obtains a more detailed understanding from each pricing service regarding how they derived the price assigned to each security. Where inputs or prices do not reflect market participant assumptions, the Company will challenge these prices and apply different methodologies that will enhance the use of observable inputs and data. The Company may use non-binding broker quotes or internal valuations to support the fair value of securities that go through this formal price challenge process. At December 31, 2025, the Company challenged the price it received from third party pricing services on general account securities with a book value of $242,307 and a market value of $297,025. The Company did not have any price challenges on separate account securities for what it received from third party pricing services.

In addition, the Company has a pricing committee that provides oversight over the Company's prices and fair value process for securities. The committee meets quarterly and is responsible for the review and approval of the Company's valuation procedures. The committee is also responsible for the review of pricing exception reports as well as the review of significant inputs used in the valuation of assets that are valued internally.
For Level 1 investments, valuations are generally based on observable inputs that reflect quoted prices for identical assets in active markets.

The fair value for Level 2 and Level 3 valuations are generally based on a combination of the market and income approach. The market approach generally utilizes market transaction data for the same or similar instruments, while the income approach involves determining fair values from discounted cash flow methodologies.

The following represents a summary of significant valuation techniques for assets and liabilities used to determine fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Level 1 measurements

SVO identified bond ETF

For U.S. SAP, bonds reported as Level 1 represent investments in certain SVO approved ETF and mutual funds. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available. All other ETFs and mutual funds are classified and accounted for as common stock.

Common stocks

These securities are comprised of exchange traded U.S. and foreign common stock and mutual funds. The fair value of these securities is primarily based on unadjusted quoted prices in active markets that are readily and regularly available.

Derivatives

These derivatives are comprised of exchange traded future contracts. Valuation of these securities is based on unadjusted quoted prices in active markets that are readily and regularly available.

Separate accounts assets

These assets are comprised of exchange traded funds, common stocks and actively traded open-end mutual funds with a daily net asset value ("NAV"). The NAV can be observed by redemption and subscription transactions between third parties, or may be obtained from third-party asset managers. Therefore, the fair values of these investments has been reflected within Level 1 in the fair value hierarchy. Common stocks are generally traded on an exchange.

Level 2 measurements

Preferred stocks

The fair value of preferred stock is obtained from third-party pricing services. Vendors generally use an income-based valuation approach by using a discounted cash flow model or it may use a market approach to arrive at the security's fair value or a combination of the two.

Bonds

The fair value of bonds is obtained from third-party pricing services, matrix-based pricing, internal models or broker quotes. Third-party pricing services generally use an income-based valuation approach by using a discounted cash-flow model or it may also use a market approach by looking at recent trades of a specific security to determine fair value on public securities or a combination of

NOTES TO FINANCIAL STATEMENTS

the two. Typical inputs used by these pricing services include, but are not limited to: benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds, which the Company has determined are observable inputs.

Private placement securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Specifically, the Barclays Investment Grade Corporate Index is used for investment-grade securities and the Citi High Yield Cash Index is used for below investment-grade securities. These indices are two widely recognized, reliable and well regarded benchmarks by participants in the financial services industry, which represent the broader U.S. public bond markets. The spreads derived from each matrix are adjusted for liquidity. The liquidity premium is standardized and based on market transactions.

Certain private placement securities that cannot be priced using the matrix pricing described above, are priced by an internally developed discounted cash flow model or are priced based on internal calculations. The model uses observable inputs with a discount rate based off spreads of comparable public bond issues, adjusted for liquidity, rating and maturity. The Company assigns a credit rating for private placement securities based upon internal analysis. The liquidity premium is usually based on market transactions. These securities are classified as Level 2.

For some of the private placement securities priced through the model, the liquidity adjustments may not be based on market data, but rather, calculated internally. If the impact of the liquidity adjustment, which usually requires the most judgment, is not significant to the overall value of the security, the security is still classified as Level 2. If it is deemed to be significant, the security is classified as Level 3.

Common Stocks

These securities include equity investments that do not trade in an active market and are valued based on prices obtained from independent pricing vendors using unadjusted quoted prices in active markets for similar securities that are readily and regularly available. These prices are validated for reasonableness against recently traded market prices.

Derivatives (including separate accounts liabilities – derivatives)

The fair value of derivative instruments is generally derived using valuation models that use an income approach, except for derivatives, which are either exchange-traded, or the fair value is priced using broker quotations. The selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves, foreign exchange rates, equity prices, credit curves, measures of volatility and other factors. OTC derivatives that trade in liquid markets, where model inputs are observable for substantially the full term, are classified as Level 2.

Other Invested Assets

Other invested assets include single asset single borrower commercial mortgage backed securities. The single asset single borrower commercial mortgage backed securities are valued using prices from third-party pricing services that generally use a discounted cash-flow model or a market approach to arrive at the security's fair value and are classified as Level 2.

Separate accounts assets

These are assets primarily related to investments in U.S. government and treasury securities, corporate bonds and mortgage-backed securities. These separate accounts assets are valued and assigned within the fair value hierarchy, consistent with the methodologies described herein for similar financial instruments held within the general account of the Company.

Level 3 measurements

Bonds

The valuation techniques for most Level 3 bonds are generally the same as those described in Level 2. However, if the investments are less liquid or are lightly traded, there is generally less observable market data, and therefore these investments will be classified as Level 3. Circumstances where observable market data are not available may include events such as market illiquidity and credit events related to the security. In addition, certain securities are priced based upon internal valuations using significant unobservable inputs. If a security could not be priced by a third-party vendor or through internal pricing models, broker quotes are received and reviewed by each investment analyst. These inputs may not be observable. Therefore, Level 3 classification is determined to be appropriate.

If the price received from third-party pricing services does not appear to reflect market activity, the Company may challenge the price. For securities which go through this formal price challenge process, a non-binding broker quote, or internal valuation is used to support the fair value instead. The Company also uses non-binding broker quotes to fair value certain bonds, when the Company is unable to obtain prices from third-party vendors.

Private placement securities where adjustments for liquidity are considered significant to the overall price are classified as Level 3.

Preferred and common stocks

These securities include equity investments with privately held entities, including a government organization, where the prices are derived from internal valuations.

Derivatives

Derivatives that are valued based upon models with any significant unobservable market inputs or inputs from less actively traded markets, or where the fair value is solely derived using broker quotations, are classified as Level 3.

Other Invested Assets

Other invested assets include preferred units of a limited partnership and residual tranches of securitizations. The fair value of the preferred units is derived internally based on market comparable and recent transactions by the limited partnership. This valuation technique used required inputs that were both unobservable and significant and therefore classified as Level 3. The fair value of the residual tranches of securitizations is derived using an income valuation approach, which is based on a discounted cash flow calculation that may or may not use observable inputs and is classified as Level 3.

Bonds

The fair value of bonds is determined by considering one of four primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from nationally recognized third-party pricing services, (2) securities are priced using a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices, (3) securities are priced using an internal pricing model or methodology, and (4) securities are submitted to independent brokers for prices.

The pricing service generally uses an income-based approach by using a discounted cash-flow model or it may also use a market approach by looking at recent trades of a specific security to determine fair value on public securities or a combination of the two. Typical inputs used by these pricing services include, but are not limited to; benchmark yields, reported trades, issuer spreads, bids, offers, benchmark securities, estimated cash flows and prepayment speeds.

Independent pricing vendors do not supply prices for private placement bonds. These securities are primarily priced using a market approach such as a matrix-based pricing methodology, which uses spreads derived from third-party benchmark bond indices. Any private securities that cannot be priced using this methodology, are priced using an internally developed model based upon assigned comparable public issues adjusted for liquidity, maturity and rating or are priced based on internal calculations. The Company assigns a credit rating based upon internal analysis.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Included in bonds are affiliated bonds from MCF and NYL Investments. The affiliated bond from MCF had a carrying value of $2,690,203,118 and a fair value of $2,790,278,673 as of December 31, 2025. The fair value of this security is calculated internally and may include inputs that may not be observable. Therefore, this security is classified as Level 3. The affiliated bond from NYL Investments had a carrying value of $762,000,000 and fair value of $760,080,000 at December 31, 2025. The fair value of this security is calculated internally using observable inputs and is therefore classified as Level 2.

Preferred and common stocks

The fair value of unaffiliated equity securities is determined by considering one of three primary sources: (1) security pricing is applied using a hierarchy approach whereby publicly available prices are first sought from third-party pricing services, (2) the remaining un-priced securities are submitted to independent brokers for prices, and (3) securities are priced using an internal pricing model or methodology.

Prices from pricing services and broker quotes are validated on an ongoing basis to ensure the adequacy and reliability of the fair value measurement. The Company performs both quantitative and qualitative analysis of the prices including, initial and ongoing review of third-party pricing methodologies, back testing of recent trades, and a thorough review of pricing trends and statistics.

Mortgage loans

The estimated fair value of mortgage loans is determined using an income approach, based upon the present value of the expected cash flows discounted at a market yield using an internally calculated spread. The spread is based on management's judgment and assumptions, which takes into account matters such as property type, LTV and remaining term of each loan, etc. The spread is a significant component of the pricing inputs, and therefore, these investments are classified as Level 3.

NOTES TO FINANCIAL STATEMENTS

Cash, cash equivalents, short-term investments and investment income due and accrued

Cash on hand and money market mutual funds are classified as Level 1. Cash overdrafts (i.e. outstanding checks) are classified as Level 2. Due to the short-term maturities of cash equivalents, short term investments, and investment income due and accrued, carrying value approximates fair value and is classified as Level 2.

Derivatives (including separate accounts liabilities)

The fair value of derivative instruments is generally derived using valuation models that use an income approach, except for derivatives that are exchange-traded, which are valued using quoted prices in an active market. Where valuation models are used, the selection of a particular model depends upon the contractual terms of, and specific risks inherent in the instrument, as well as the availability of pricing information in the market. The Company generally uses similar models to value similar instruments. Valuation model inputs include contractual terms, yield curves, foreign exchange rates, equity prices, credit curves, measures of volatility and other factors.

Derivatives - collateral (including separate accounts liabilities - collateral)

The carrying value of these instruments approximates fair value since these assets and liabilities are generally short-term in nature and are classified as Level 2.

Other invested assets

Other invested assets are principally comprised of tax credit investments, surplus notes, capital notes, single asset single borrower commercial mortgage backed securities, affiliated loans, residual tranches of securitizations and other investments with characteristics of debt. Surplus notes, capital notes and single asset single borrower commercial mortgage backed securities are valued using prices from third-party pricing services that generally use a discounted cash-flow model or a market approach to arrive at the security's fair value and are classified as Level 2. The fair value of affiliated loans and the tax credit investments is derived using an income valuation approach, which is based on a discounted cash flow calculation using a discount rate that is determined internally and therefore classified as Level 3. (refer to Note 5 - Investments in Tax Credit Structures). The fair value of the majority of the other investments with debt characteristics and the majority of the residual tranches of securitizations is derived using an income valuation approach, which is based on a discounted cash flow calculation that may or may not use observable inputs and therefore is classified as Level 3.

Separate accounts assets (including collateral)

Assets within the separate accounts are primarily invested in bonds, common stocks and preferred stocks. The fair value of investments in the separate accounts is calculated using the same procedures as are used for bonds and common stocks in the general account.

The separate accounts also invest in limited partnerships, private equity and hedge fund investments. The fair value of such partnerships is determined by reference to the limited partnership's NAV. The valuation of the hedge funds is based upon the funds' latest financial statements adjusted for cash activity since that date and estimates of market valuations.

Deposit fund contracts

Fair values for annuities certain liabilities are estimated using discounted cash flow calculations based on interest rates currently being offered for similar contracts with maturities consistent with those remaining for the contracts being valued.

Borrowed money

Borrowed money consists of a financing arrangement. The carrying value of the financing arrangement approximates fair value. At December 31, 2025, the Company had no repurchase agreements.

Amounts payable for securities lending

Amounts payable for securities lending consists of cash collateral received under securities lending agreements. The carrying value approximates fair value.

D. If it is not practicable for an entity to estimate the fair value of that financial instrument or a class of financial instruments, the following shall be disclosed:

(1)-(2) Not applicable.

E. The following table provides additional information for investments that are measured using NAV as a practical expedient to estimate fair value, as allowed under authoritative guidance, for investments that meet specified criteria:

21. Other Items

A. Unusual or Infrequent Items

The Company continues to monitor the economic environment and other potential impacts that could result from current or future outbreaks of infectious diseases, viruses (including COVID-19), epidemics or pandemics.

NOTES TO FINANCIAL STATEMENTS

The Company entered into a flow reinsurance agreement on a quota share basis with Everlake Life Insurance Company, an unaffiliated life insurance company, effective February 3, 2025. Under the agreement, the Company cedes all risks associated with certain fixed deferred annuity policies issued on or after the effective date, on a coinsurance with funds withheld basis. The Company receives an expense allowance and a ceding commission. For the year ended and as of December 31, 2025, the Company ceded $3,164,572,478 in premiums and $3,213,547,426 in reserves under this agreement.

B. Troubled Debt Restructuring: Debtors

Not applicable.

C. (1) Other Disclosures

Assets with a carrying value of $4,894,301 at December 31, 2025 were on deposit with government authorities or trustees as required by certain state insurance laws.

D. Business Interruption Insurance Recoveries

Not applicable.

E. State and Federal Tax Credits

F. Subprime and Midprime Mortgage Related Risk Exposure

(1) The Company categorizes mortgage securities with an average FICO score (credit score) of 625 or less as "subprime" mortgage securities and mortgage securities with an average FICO score of greater than 625 and less than 700 as "midprime" mortgage securities. Securities with an average FICO score of 700 or greater are characterized as "prime". The delinquency, credit loss, prepayment rate of the pool of mortgages collateralizing the investment and credit enhancement available for the investment are reviewed. Cash flow forecasts for each subprime and midprime mortgage security using estimates of future prepayment, delinquency, default and loss severity rates are prepared and are stress tested. This analysis shows that the majority of the unrealized losses associated with the Company's subprime and midprime mortgage holdings are due to market dislocation and is not reflective of the projected cash flows for the portfolio of securities or how these securities have performed to date.

(2) The Company does not engage in subprime residential or commercial mortgage lending and therefore has no direct exposure through investments in subprime mortgage loans.

(3) The Company has exposure to subprime and midprime residential mortgage lending through its fixed maturity investments that are collateralized by mortgages that have characteristics of subprime or midprime lending. Subprime residential mortgage lending is the origination of residential mortgage loans to customers with weak credit profiles, including using relaxed mortgage-underwriting standards that provide for affordable mortgage products. These investments are primarily in the form of asset-backed securities ("ABS") supported by subprime or midprime residential mortgage loans or collateralized debt securities ("CDOs") that contain a subprime or midprime loan component. The collective carrying value of these investments is $372,786,622 representing 0.34% of total fixed maturity investments. Of this amount, 66.67% had "AAA" or "AA" credit quality ratings. There was no common stock subprime or midprime exposure. The Company manages its subprime and midprime risk exposure by limiting the Company's holdings in these types of instruments, and performing ongoing analysis of cash flows, prepayment speeds, default rates and other stress variables.

The Company's general account fixed maturity investments that are collateralized by residential mortgages that have characteristics of subprime or midprime lending at December 31, 2025 are:

Subprime - Type	Actual Cost	Book Adjusted Carrying Value	Fair Value	OTTI Losses
Residential mortgage-backed securities	$ 28,216,916	$ 28,774,643	$ 28,792,196	$ 1,809,456

(4) The Company does not have underwriting exposure to subprime mortgage risk through mortgage guaranty or financial guaranty insurance coverage.

NOTES TO FINANCIAL STATEMENTS

G. Retained Assets

(1) Effective June 1, 2012, the Company ceased offering retained asset accounts as a settlement option to life insurance and annuity beneficiaries. Prior to that date, beneficiaries could select the retained asset account as a settlement option for satisfying individual life insurance and annuity claims of $10,000 or more. Retained asset accounts are interest-bearing draft accounts administered by an unaffiliated bank and beneficiaries may access available funds by writing a check for any amount up to the full remaining balance of the net claim settlement. The Company's aggregate liability for retained asset accounts is reported as a component of liability for deposit-type contracts on Page 3 – Liabilities, Surplus and Other Funds.

Interest rates for retained asset accounts are not guaranteed and are declared periodically at the discretion of the Company. The following interest rates were paid to retained asset account holders in 2025:

Effective Date		Interest Rate $10,000 or more	Interest Rate $9,999.99 or less
From	Through		
1/1/2025	1/5/2025	2.97%	2.47%

22. Events Subsequent

At February 24, 2026, the date the financial statements were available to be issued, there have been no other events occurring subsequent to the close of the Company's books or accounts for the accompanying annual statement that would have a material effect on the financial condition of the Company.

23. Reinsurance

A. Ceded Reinsurance Report

Section 1 – General Interrogatories

(1) Are any of the reinsurers, listed in Schedule S as non-affiliated, owned in excess of 10% or controlled, either directly or indirectly, by the company or by any representative, officer, trustee, or director of the company? Yes ( ) No (X). If yes, give full details. N/A

(2) Have any policies issued by the company been reinsured with a company chartered in a country other than the United States (excluding U.S. Branches of such companies) which is owned in excess of 10% or controlled directly or indirectly by an insured, a beneficiary, a creditor or an insured or any other person not primarily engaged in the insurance business? Yes ( ) No (X). If yes, give full details. N/A

Section 2 – Ceded Reinsurance Report – Part A

(1) Does the company have any reinsurance agreements in effect under which the reinsurer may unilaterally cancel any reinsurance for reasons other than for nonpayment of premium or other similar credits? Yes ( ) No (X).

a. If yes, what is the estimated amount of the aggregate reduction in surplus of a unilateral cancellation by the reinsurer as of the date of this statement, for those agreements in which cancellation results in a net obligation of the company to the reinsurer, and for which such obligation is not presently accrued? Where necessary, the company may consider the current or anticipated experience of the business reinsured in making this estimate. N/A

b. What is the total amount of reinsurance credits taken, whether as an asset or as a reduction of liability, for these agreements in this statement? N/A

(2) Does the company have any reinsurance agreements in effect such that the amount of losses paid or accrued through the statement date may result in a payment to the reinsurer of amounts which, in aggregate and allowing for offset of mutual credits from other reinsurance agreements with the same reinsurer, exceed the total direct premium collected under the reinsured policies? Yes ( ) No (X). If yes, give full details N/A

Section 3 – Ceded Reinsurance Report – Part B

(1) What is the estimated amount of the aggregate reduction, in surplus, for agreements not reflected in Section 2 above, of termination of all reinsurance agreements, by either party, as of the date of this statement? Where necessary, the company may consider the current or anticipated experience of the business reinsured in making this estimate. If all reinsurance agreements were terminated by either party as of the date of the statement, the resulting reduction in surplus due to loss of reserve credits net of unearned premium would be approximately $385,400,000

(2) Have any new agreements been executed or existing agreements amended, since January 1 of the year of this statement, to include policies or contracts which were in-force or which had existing reserves established by the Company as of the effective date of the

NOTES TO FINANCIAL STATEMENTS

agreement? Yes ( ) No (X) If yes, what is the amount of reinsurance credits, whether an asset or reduction of liability, taken for such new agreements or amendments? N/A

B. Uncollectible Reinsurance

26. Intercompany Pooling Arrangements

Not applicable.

27. Structured Settlements

The Company owns all rights, title and interest in and to certain structured settlement annuity contracts issued by New York Life. The carrying value of the annuity contracts is based upon the actuarially determined value of the obligations under the structured settlement agreements (noted below), which generally have some life contingent benefits.

The Company is the assumed obligor for certain structured settlement agreements with unaffiliated insurance companies, beneficiaries and other non-affiliated entities. To satisfy its obligations under these agreements, the Company owns all rights, title and interest in and to certain structured settlement annuity contracts issued by New York Life. The obligations are based upon the actuarially determined present value of expected future payments. Interest rates used in establishing such obligations ranged from 1.00% to 7.65%. The Company has directed New York Life to make the payments under the annuity contracts directly to the beneficiaries under the structured settlement agreements. At December 31, 2025 and 2024, the carrying value of the interest in annuity contracts and the corresponding obligations under structured settlement agreements amounted to $12,355,396,100 and $11,428,057,478 respectively.

30. Premium Deficiency Reserves

Not applicable.

31. Reserves for Life Contracts and Annuity Contracts

(1) Surrender values are promised in excess of reserves included in Exhibit 5 – Life Insurance. This excess is included in Exhibit 5 – Miscellaneous Reserves. No surrender values are promised in excess of the total reserves included in other sections of Exhibit 5.

(2) Additional reserves are held on account of anticipated extra mortality for policies subject to extra premiums.

(3) At December 31, 2025, the Company had $9,516,821,068 of insurance in-force for which the gross premiums were less than the net premiums according to the standard of valuation set by the state of Delaware. Reserves to cover the above insurance totaled $275,403,119 at December 31, 2025 and were reported in Exhibit 5 – Miscellaneous Reserves.

(4) The tabular interest (Page 7, Line 4) for Variable Life has been determined by formula as described in the instructions for Page 7. The tabular interest for other life policies has been determined from the basic data for the calculation of policy reserves.

The tabular cost less actual reserves released (Page 7, Line 5) has been determined by formula as described in the instructions for Page 7.

The tabular cost (Page 7, Line 9) has been determined by formula as described in the instructions for Page 7.

35. Separate Accounts

A. Separate Accounts Activity

(1) The Company utilizes separate accounts to record and account for assets and liabilities for particular lines of business and/or transactions, including:

- Variable universal life (“VUL”) insurance products guaranteed
- VUL insurance products non-guaranteed
- VA products non-guaranteed
- UL insurance products guaranteed

In accordance with the domiciliary state procedures for approving items within separate accounts, the classification of the separate accounts is subject to Section 2932 of the Delaware Insurance Code and the regulations thereunder. Assets of guaranteed separate accounts are invested in accordance with the provisions of Chapter 13 of the Delaware Insurance Code.

All items that were permitted for separate accounts reporting were supported by state statute.

(2) At December 31, 2025 and 2024, the Company’s separate accounts statement included legally insulated assets of $67,836,192,162 and $60,124,161,449 , respectively. The assets legally and not legally insulated from the general account at December 31, 2025 are attributed to the following products or transactions:

	Separate Accounts Assets	
Product /Transaction	Legally Insulated Assets	(Not Legally Insulated)[1]
VA products non-guaranteed	$ 43,115,182,351	$ 32,468,615
VUL insurance products non-guaranteed	18,460,568,922	4,870,073
UL insurance products guaranteed	6,112,850,927	81,508,669
VUL insurance products guaranteed	147,589,962	17,258,932
Total	$ 67,836,192,162	$ 136,106,289

[1] Separate accounts assets classified as not legally insulated support: $99,953,335 of remittances and items not allocated and other transfers to the general account due or accrued (net), $17,437,172 of surplus, $12,983,320 of derivatives, and $5,732,462 of other liabilities.

(3) To compensate the general account for the risk taken, the separate accounts have paid risk charges as follows for the past five years:

a.	2025	$ 59,118,813
b.	2024	$ 62,232,374
c.	2023	$ 65,099,731
d.	2022	$ 67,296,291
e.	2021	$ 62,309,282

For the periods ending December 31, 2025, 2024, 2023, 2022 and 2021, the general account of the Company paid $3,030,330, $3,092,538, $11,528,774, $11,512,487, and $4,093,662 respectively, toward separate accounts guarantees.

The book value guaranteed separate accounts generally do not pass through all investment performance to policyholders, as certain investment limitations are imposed on the assets supporting these accounts. At December 31, 2025, separate accounts assets totaled $6,359,208,490 and no risk charges were paid to the general account. Certain of the separate accounts variable contracts have guaranteed minimum death benefit (“GMDB”) and guaranteed minimum accumulation benefit (“GMAB”) features that are guaranteed by the assets of the general account. At December 31, 2025, separate account assets totaled $43,147,650,966 and risk charges paid to the general account totaled $59,118,813. Separate account assets related to both book value guaranteed accounts and certain variable contracts are included in the Company’s asset adequacy testing.

(4) At December 31, 2025, the separate accounts did not enter into securities lending arrangements or party to dollar repurchase agreements and reverse repurchase agreements.

NOTES TO FINANCIAL STATEMENTS

(5) At December 31, 2025, there are no asset-for-asset swaps, or asset transfers between separate accounts and general account.

B. General Nature and Characteristics of Separate Accounts Business

The Company maintains non-guaranteed variable separate accounts for individual and group life and annuity policies. The assets in these accounts are carried at fair value.

The Company maintains five book value guaranteed separate accounts for UL insurance policies and one book value guaranteed separate account for a private placement VUL policy. These accounts provide a guarantee of principal and interest, subject to a market value adjustment upon certain surrenders, and a transfer adjustment charge is imposed upon certain transfers. Interest rates on these contracts may be adjusted periodically. The assets of these separate accounts are stated at amortized cost up to the value of policyholder reserves, with any excess assets stated at fair value.

Information regarding the separate accounts of the Company is as follows:

(a) Active Status Counts:

1. L - Licensed or Chartered - Licensed insurance carrier or domiciled RRG..... 53
2. R - Registered - Non-domiciled RRGs.....
3. E - Eligible - Reporting entities eligible or approved to write surplus lines in the state.....
4. Q - Qualified - Qualified or accredited reinsurer.....
5. N - None of the above - Not allowed to write business in the state..... 4

(b) Explanation of basis of allocation by states, etc., of premiums and annuity considerations

Direct Ordinary premiums and annuity considerations are allocated by states on the basis of the address to which the premium notice is sent. Corporate Owned Life Insurance and Single premiums are allocated to the residence of the insured, owner, or annuitant or the address designated as the one to which business communication should be sent.

*Premium or annuities considerations waived under disability or other contract provisions are shown in one sum on Line 93, Columns 2, 3, 4, 5, 6, and 7. **All US business must be allocated by state regardless of license status. Life Insurance and Multi Funded Annuity considerations included above are actual amounts received by the Company whereas in the Separate Account the amounts may differ because of fluctuations in unit values between the record date and processing date. NOTE: Schedule T should not be used as the basis for state guaranty association assessments.

(c) Column 4 should balance with Exhibit 1, Lines 6.4, 10.4 and 16.4, Col. 6, or with Schedule H, Part 1, Line 1, indicate which: Exhibit 1, Lines 6.4, 10.4, and 16.4, Col. 6.....
